EXECUTIVE SUMMARY

The Forest High School (FHS) is undertaking a redevelopment that will include new infrastructure, buildings, and associated landscaping. Kleinfelder Australia Pty Ltd was engaged by ADCO, acting on behalf of SINSW, to prepare a Microbat Management Plan (MMP) for the project at FHS. This is required under Environment and Heritage Group (EHG) recommendations for inclusion of the Development Consent B30 of the SSD- 26876801 that requires the MMP must address, but not be limited to, the condition in **Table 1**.

Table 1: Compliance Table for SSD- 26876801 condition B30

Condition	Compliance
A microbat management plan must be prepared by a suitably qualified ecologist prior to the commencement of construction which includes implementation of measures to exclude microbats from potential habitat that could be used for roosting, breeding or torpor prior to works/construction commencing.	Prepared by Dr Cassandra Bugir (PhD Conservation Ecology, BSc Ecology and Evolutionary Biology). Cassandra has over 5 years of experience in wildlife ecology with a focus on bats, reptiles, amphibians, and birds in NSW. CV in Appendix B .
