

Cooler Classrooms

Benefits beyond cooling

Cooler Classrooms is a \$500 million program that will deliver sustainable air conditioning in schools across NSW.

The NSW Government is committed to cooling classrooms across NSW. The smart technology provides the best possible learning environments for our students and does much more than air condition classrooms. Here are a few reasons why:

Fresh air

In addition to cooling and heating, the systems will supply fresh air to avoid stuffy environments.

Improved air quality

Teachers and students will be alerted to times when additional fresh air is needed to boost indoor air quality.

Optimising comfort

Our systems are fully programmed to provide the optimal environment for any season with the touch of a button.

Promoting sustainability

Renewable energy sources – such as solar – will be installed to limit our environmental impact.

Promoting awareness

Through smart-monitoring, teachers and students can learn how to minimise their energy use.

Reduced energy usage

Air conditioning will automatically shut off when not needed. The system will also identify when simply opening a window will improve air quality.
