

# Eugowra Community Children’s Centre (ECCC) and Eugowra Public School

## Community Update | 20 April 2023

School Infrastructure NSW is continuing to prioritise a suitable location for the Eugowra Community Children’s Centre (ECCC) to occupy longer term, as soon as possible. We are committed to as little disruption as possible for the families of ECCC and Eugowra PS.

### Update on planning

As we advised in February, before ECCC can occupy temporary facilities within the Eugowra Showgrounds, an approved Development Application (DA) is required for the showground site to be used as a preschool.

In consultation with Cabonne Council and other government partners, we are proceeding with preparing this DA alongside plans to also formalise use of the Eugowra Public School as a preschool site.

We will pursue preparation and submission of both DAs, to find the quickest and most effective solution for the community.

All use of Eugowra PS for the preschool to date has been conducted under exempt development under the Transport and Infrastructure State Environmental Planning Policy, as part of a short-term disaster response. A DA is now required for longer-term use of the site.

We have engaged several consultants to complete site-based analysis and technical reports required to support the planning applications. This includes heritage, bushfire, soil, waste management, transport, disability access, and others.

### Update on work at Eugowra Public School

Further to our update, we are providing additional facilities to support the effective operation of both Eugowra Public School and the ECCC.

These buildings will begin to be installed onsite this week and work will continue when Term 2 starts. We anticipate that all work will be finished and the buildings in use during Term 2.

We are working closely with the contractor and the Eugowra PS leadership to limit disruption and disturbance to students, staff, and families.

### Thank you

We thank you for your ongoing patience and we will continue to keep the Eugowra community informed on progress.
