

New school infrastructure investment

2022/23 NSW Budget

June 2022

Investing in our schools

The NSW Government is increasing its historic investment in new and upgraded schools, with funding for 23 projects announced as part of the 2022/23 NSW Budget.

Nine of the major school projects are part of the NSW Government's commitment to WestInvest, a \$5 billion infrastructure program transforming Western Sydney. WestInvest will improve the liveability of communities and support economic recovery, making a real difference to the quality of life in the 15 local government areas that are supported by the program.

Expanding the use of modern methods of construction on these projects means new schools and school upgrades will be delivered faster than before and will also help to grow the advanced manufacturing industry in NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

The NSW Government is investing \$8.6 billion over the next four years, continuing delivery of 160 new and upgraded schools. This builds on the \$9.1 billion in projects delivered since 2017, a program of \$17.7 billion in public education infrastructure. This is the largest investment in school building in the history of NSW.
