

New school infrastructure investment

2021/2022 NSW Budget

June 2021

The NSW Government is increasing its historic investment in new and upgraded schools, with funding for 44 new and upgraded school projects announced as part of the 2021/22 Budget.

This includes funding for 30 projects that were prioritised for planning and 14 new projects in areas of high need.

With 100 new and upgraded schools delivered since 2019 and 50 last year alone, this budget continues an historic school infrastructure program with an additional \$2.1 billion spend to deliver new and upgraded schools over the next four years.

This latest announcement brings the total number of new and upgraded schools being delivered to 215. These projects will serve our communities, with a concentration to meet areas with high growth such as North West Sydney and South West Sydney, and in areas of need such as regional NSW.

The full budget will be handed down on 22 June where the full scale of investment in education in NSW will be realised.

This continues the program to deliver 215 new and upgraded schools representing an injection of \$7.9 billion into the NSW economy over the next four years.
