

The metal fence artwork is being retained and protected during construction

Alexandria Park Community School

Project update

November 2019

Investing in our schools

The NSW Government is investing \$6.7 billion over the next four years to deliver 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

The first concrete capping slab has been poured

Alexandria Park Community School project

The overall masterplan for Alexandria Park Community School will allow the school to cater for 1000 primary students and up to 1200 secondary students.

The school is being redeveloped to cater for increasing student enrolments from Kindergarten to Year 12. The redevelopment includes new permanent learning spaces, special education learning spaces,

and specialist rooms for subjects such as visual and performing arts, science, metalwork and woodwork. The redevelopment also provides new core facilities including an administration area, hall, library, gymnasium, sports courts and play spaces.

Stage 1 of the redevelopment is underway and will deliver facilities to cater for 1000 primary students and 850 secondary students, in line with population forecasting and to meet the capacity outlined in the approved business case.

Stage 1 of the project will deliver the highest quality facilities for students and staff with design and construction maintaining capacity to readily develop additional general learning spaces for an additional 400 secondary students in the future Stage 2 works.

School Infrastructure NSW is working closely with the Principal of Alexandria Park Community School, the Director, Educational Leadership and the Project Reference Group to deliver this project in alignment with the approved final business case.

Alexandria Park Community School is continuing to operate as usual during construction using temporary pop-up classrooms and facilities for staff and students from Kindergarten to Year 12.
