

An example of the new primary school learning spaces we are delivering across NSW

Austral Public School

Project update | February 2024

Investment in our schools

As part of the NSW Government's plan to rebuild essential services, the 2023-24 Budget is delivering a record \$3.5 billion for new and upgraded schools in Western Sydney. This targeted investment in growing communities will ensure working families get access to a world class public education.

The upgrades at Austral Public School will include new fit-for-purpose learning spaces and improved core facilities to support the growing student population in the area. It is anticipated the upgrade will deliver:

- additional fit-for-purpose permanent classrooms
- new support learning classrooms
- upgrade and refurbishment of administration facilities and library.

Progress summary

The Final Business Case (FBC) for Austral Public School upgrade project was submitted in December 2023. We have developed a concept design that provides an indication of the location of all facilities and internal layouts and room configurations.

We are now progressing with the next stage in the design process which is the schematic design phase. At this stage, we consider further input from school operations and other stakeholders to finalise the form of the buildings and functionality of internal spaces. Next steps

Once the schematic design is finalised, we will submit a Development Application (DA) to Liverpool Council. The DA will be exhibited for submissions and the determination of outcome can take up to 12 months.

The tender process to appoint a contractor to the project will begin in mid-2024.

Once the FBC is approved, DA is granted and contractor appointment is awarded, an indicative timeline for the project will be developed. We will then be able to share more information about start and completion dates.
