Innovative learning spaces

Contemporary learning and teaching prepares students for a diverse and interconnected world. We are evolving the ways we teach our students new skills valued by a changing workforce, understand different ways students learn and support new ways of interacting with information through technology.

Innovative learning environments are flexible spaces designed and equipped to support contemporary learning and teaching.

What makes an innovative learning space?

Learning space

- Different zones (areas of a building or floors) are designed to support a range of activities sometimes grouped by subject area
- Varied furniture allows for student choice, comfort and flexibility
- Spaces are flexibly connected allowing students to work in varied group sizes
- Connection between indoor and outdoor learning spaces

Organisation

- Movement is encouraged for students and teachers to collaborate and interact
- More than one teacher may be available to students within the learning environment
- Students learn in classes, small groups or individually

Teaching and learning

- Learning is personalised
- Learning is connected across different subject areas
- There is a focus on creativity and innovation with students prototyping, testing and using technology in creative ways

Technology

- Technology is integrated into spaces to extend learning opportunities
- WiFi is available everywhere including outdoors
- Specialist equipment is available for students to innovate, communicate and create
