

# Bexhill Public School

Project update | October 2021

## Investing in our schools

The NSW Government is investing \$7.9 billion over the next four years, continuing its program to deliver 215 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

## Project overview

A project is underway to upgrade Bexhill Public School. The project will deliver five new permanent learning spaces, as well as upgrades and refurbishments to the administration building, OSCH and staff spaces in the former principal's residence, community hall, sports court, and landscaping.

## Progress summary

The Development Application (DA) for construction of the new classroom building and refurbishment of the community hall, has been lodged with Lismore City Council. The DA (reference 2021/469) is available to view via the DA tracker on the council website: [tracker.lismore.nsw.gov.au/Home/Index](https://tracker.lismore.nsw.gov.au/Home/Index)

All submissions can be made directly to council during the public exhibition period.

A Review of Environmental Factors (REF) has been completed for the refurbishment of Blocks A and F. An REF is a separate planning pathway for works classified as Development without Consent under the Education State Environmental Planning Policy (SEPP) planning legislation. This means that School Infrastructure NSW itself can approve the works, subject to detailed assessment of any potential impacts and consultation with Council, land owners and other relevant stakeholders.

## Next steps

- Refurbishment works to Blocks A and F
- Site management plans are being prepared for the start of main works following DA approval.
