

# Project overview

The upgrade to Birrong Boys High School will deliver:

- 

An upgraded multipurpose hall
- 

A covered outdoor learning area
- 

Additional general learning spaces
- 

New specialised learning spaces for science, food technology and materials learning
- 

New administration and staff area
- 

Refurbishment of the student support unit
- 

Improvements to landscaped outdoor areas

# The design

The design of the Birrong Boys High School upgrade provides the Birrong community with an asset that enhances the learning and sharing experiences of students for years to come.

The upgrade to the multipurpose hall will build on the existing structure which will extend to a covered outdoor learning area connected to the new canteen. The upgraded hall and canteen, as well as landscaped outdoor areas, will be available for community use in coordination with the school.

# The design

General learning spaces and specialised learning spaces will support the learning experience for students by providing learning environments that feature space, furniture and technology that support greater collaboration and improved learning outcomes.

Flexibility also helps teachers provide a broad range of learning experiences, empowers students to learn at their own pace and support their learning in different ways.

# How we build and upgrade schools

In all our new schools or school upgrades when working on design, we must meet our Educational Facilities Standards and Guidelines (EFSG) for both indoor and outdoor education facilities. The guiding principles of the EFSG provide our vision for learning environments and are enriched by the needs and goals of the school and local community. These guidelines guarantee that all new schools and school upgrades align with the NSW Department of Education's vision and can deliver the Australian curriculum while allowing the school community to contribute ideas towards making the school their own.

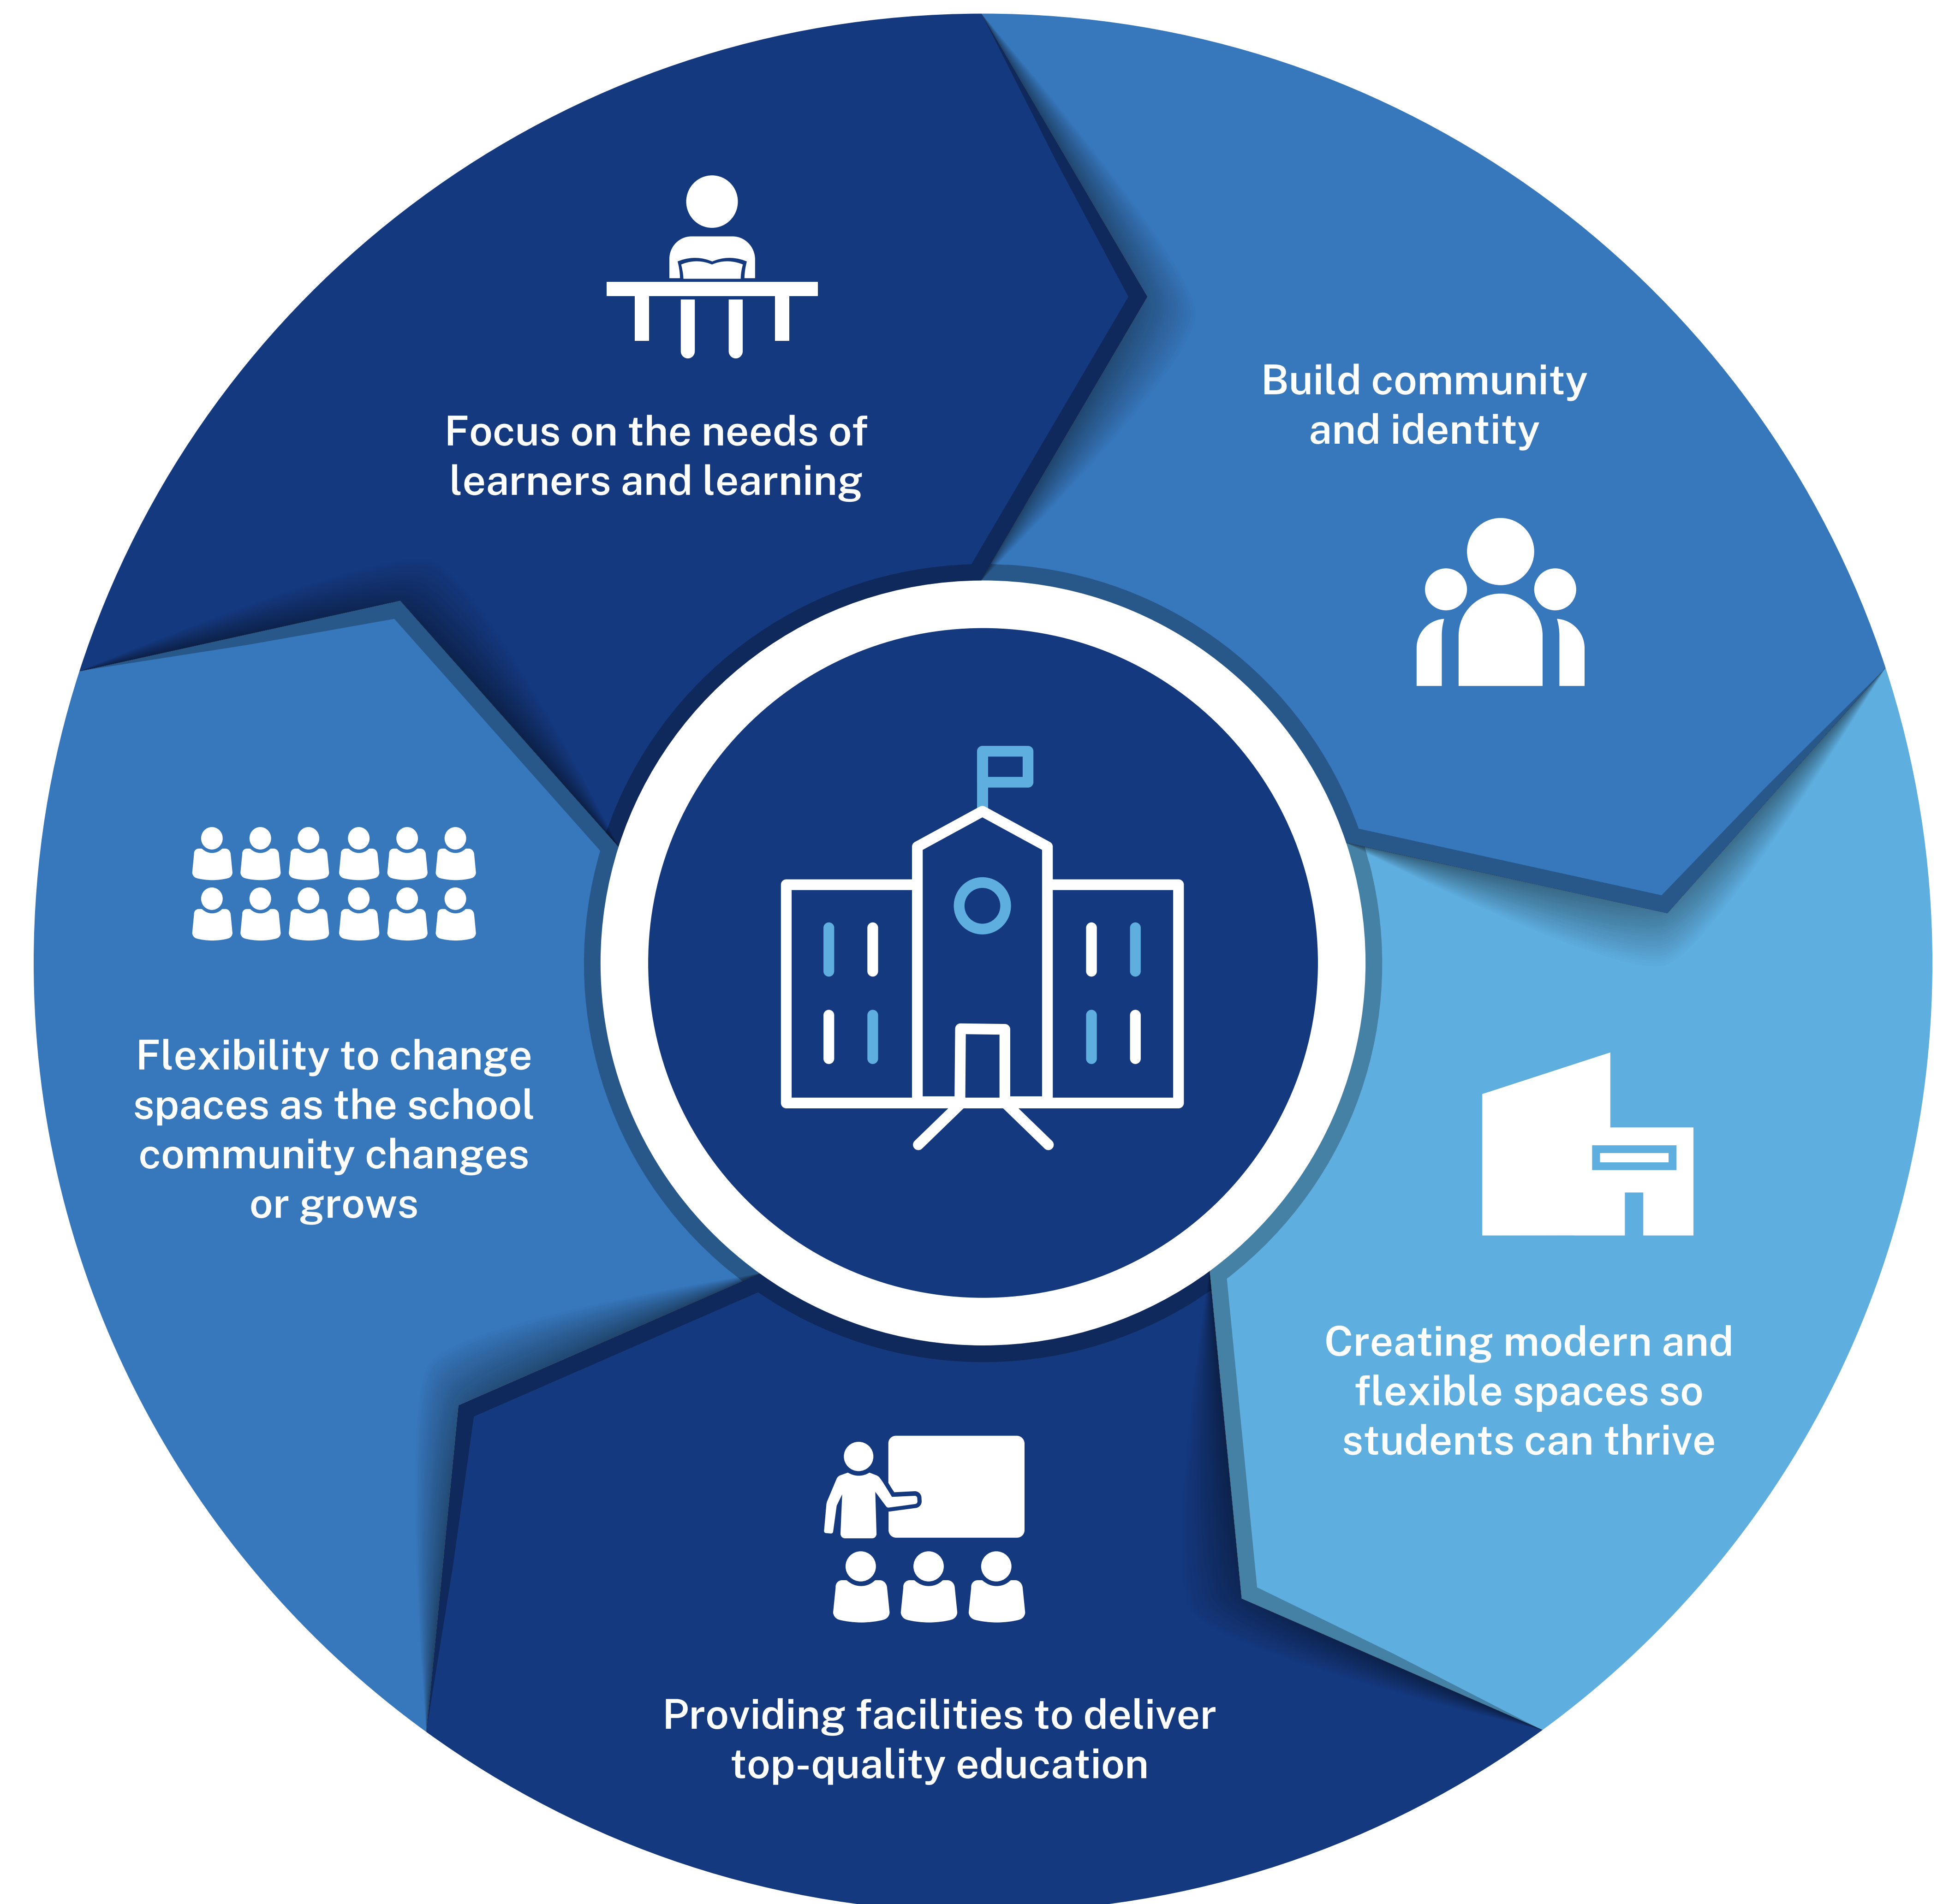

## Want to know more about how we build and upgrade schools?

We design and deliver schools to suit the individual needs of the local school community. We harness opportunities and solve challenges. As a result, no two schools are exactly the same.

What remains consistent is school infrastructure that empowers teachers to prepare students with the skills and capabilities they need to thrive in a rapidly changing and interconnected world.

Take a look at some of the upgrades we have delivered and see how these varied spaces support teaching and learning.
