

# Project overview

The upgrade to Birrong Girls High School will deliver:

- 

New multipurpose hall
- 

A covered outdoor learning area
- 

Additional general learning spaces
- 

New visual arts learning unit
- 

Refurbished materials learning unit
- 

New administration and staff areas
- 

Improvements to landscaped outdoor areas

# The design

The design of the Birrong Girls High School upgrade provides students and the broader community with an asset that enhances the learning and sharing experiences for years to come.

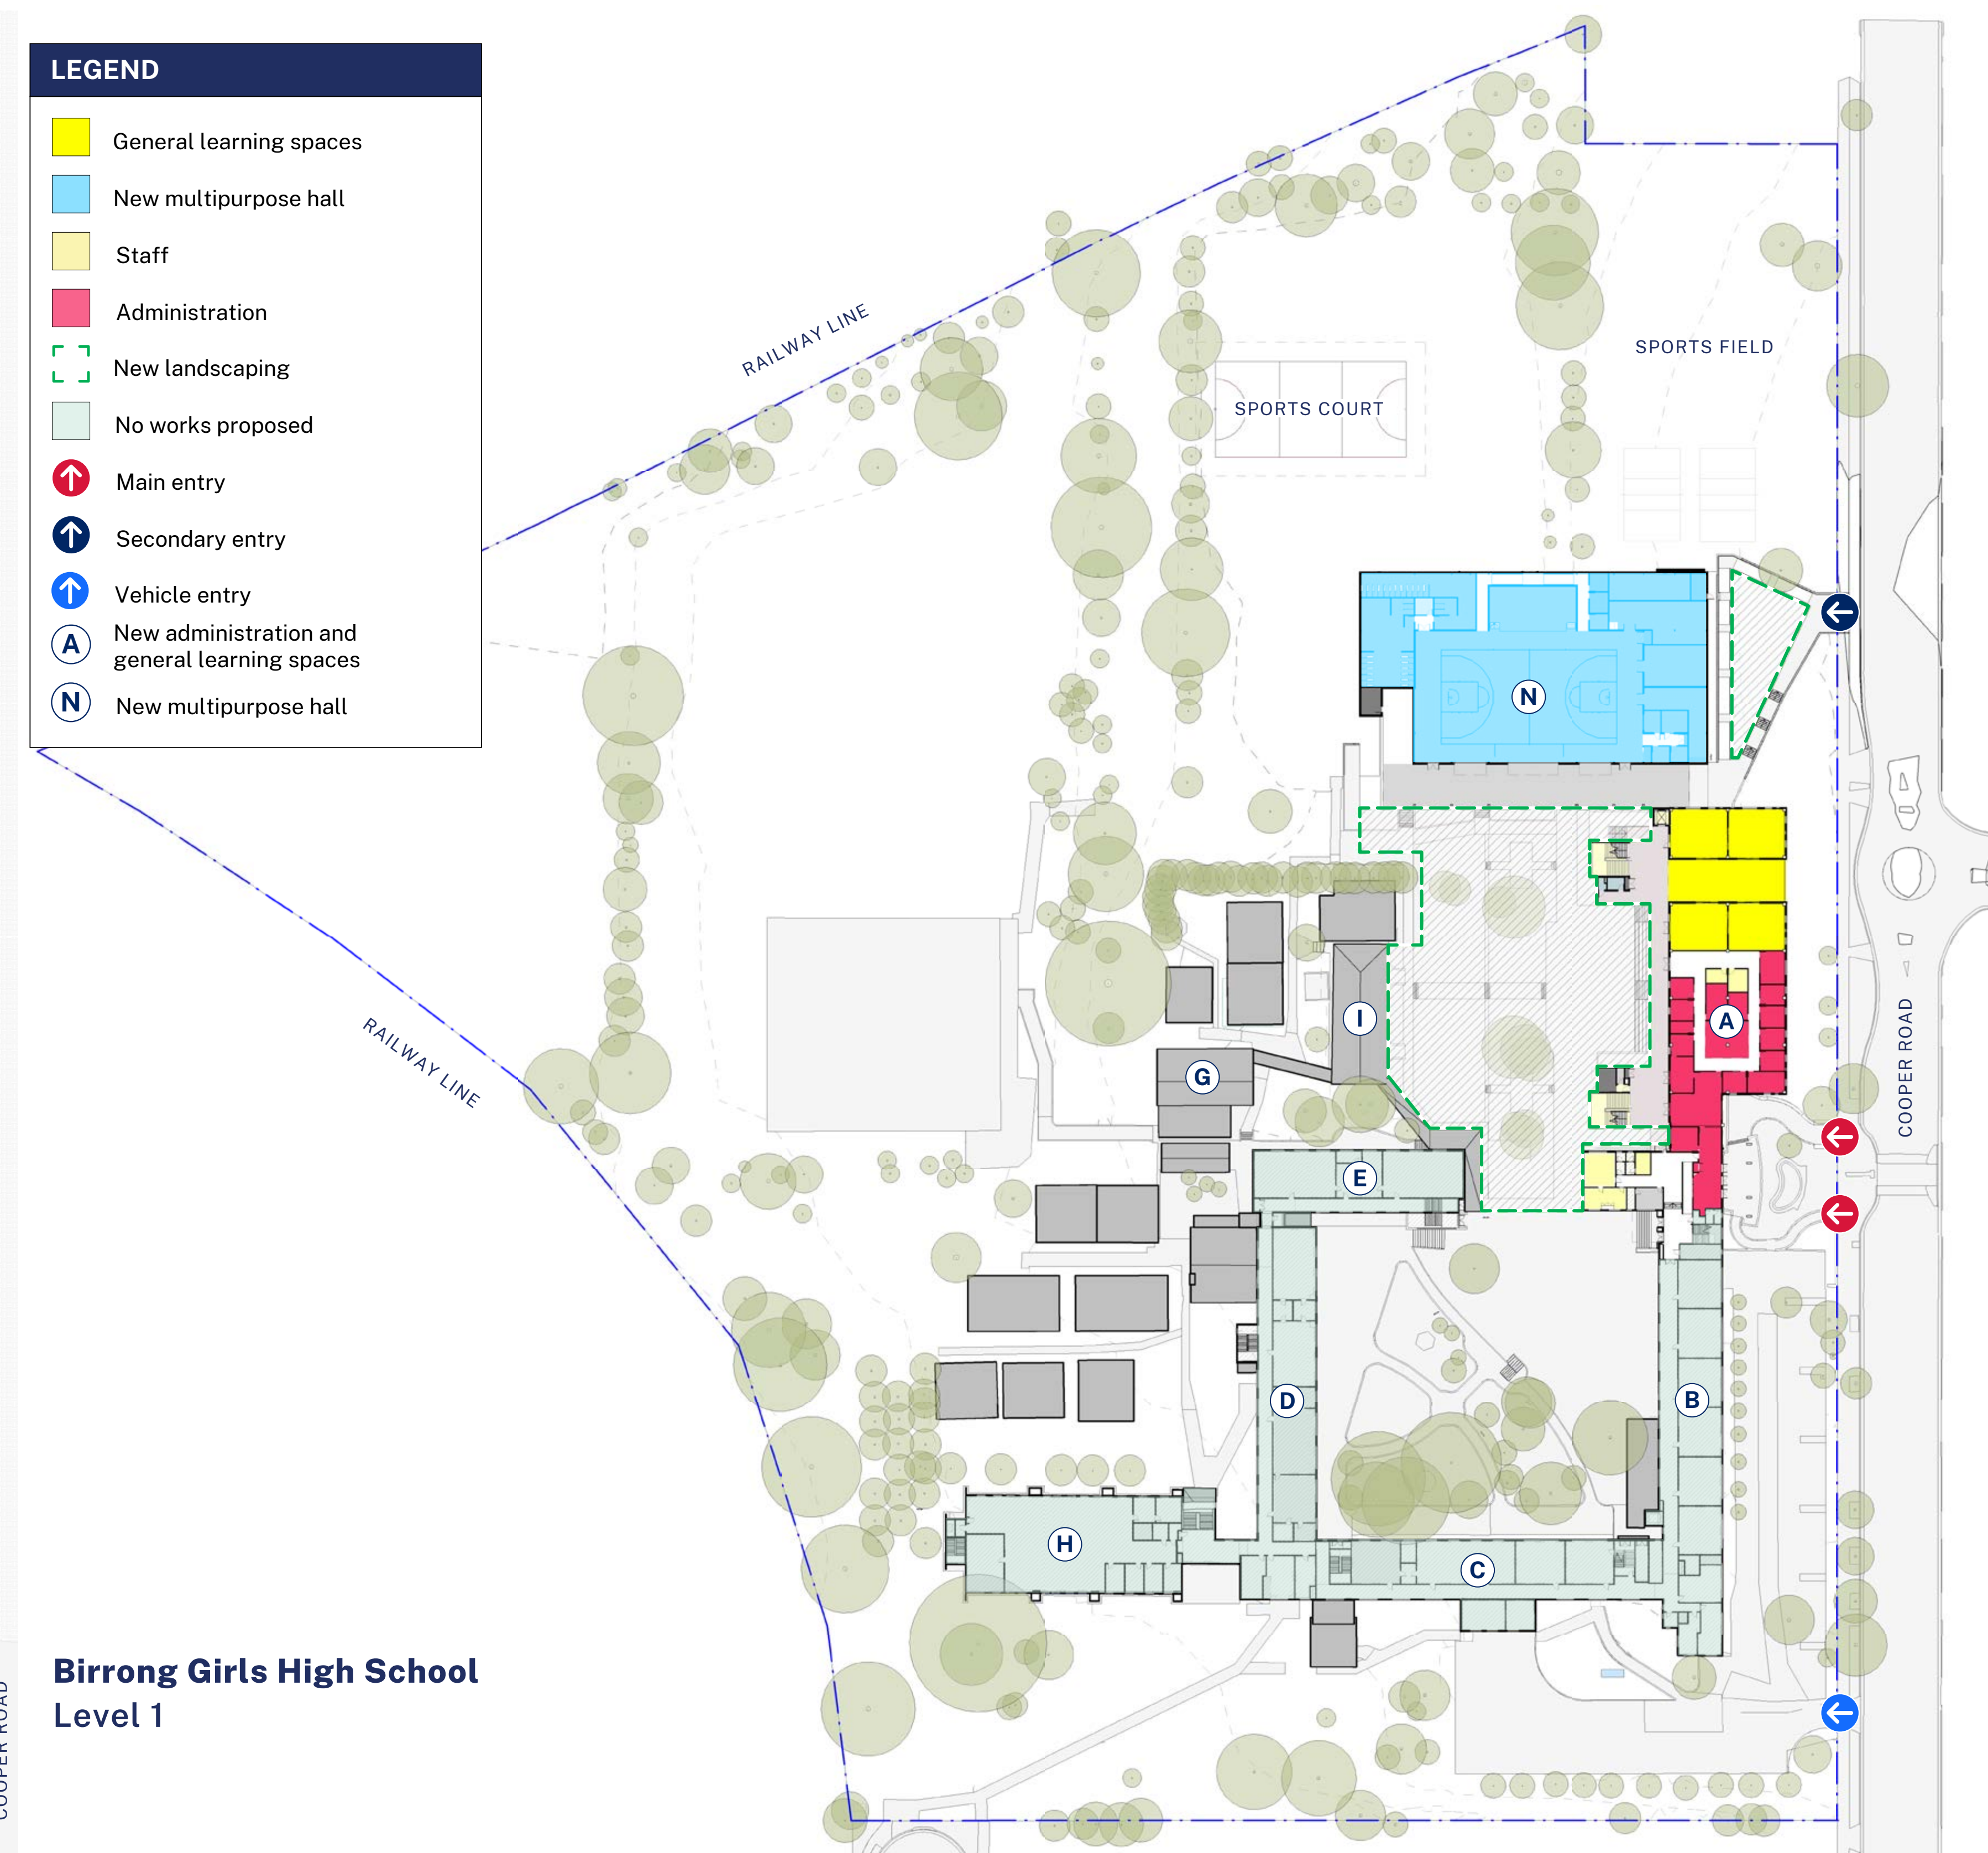

The new multipurpose hall will be located on the northern part of the school and extend to a new covered outdoor learning area. Building A will be demolished to allow for a new 3 storey building that will house administration and staff facilities as well as general and specialised learnings spaces.

# The design

General and specialised learning facilities provide environments with the space, furniture, equipment and technology to support greater collaboration and improved learning outcomes.

The flexibility built in to the learning spaces provide teachers with a range of learning environments, that enable the ability to empower students to learn at their own pace and support their learning in different ways.

# How we build and upgrade schools

In all our new schools or school upgrades when working on design, we must meet our Educational Facilities Standards and Guidelines (EFSG) for both indoor and outdoor education facilities. The guiding principles of the EFSG provide our vision for learning environments and are enriched by the needs and goals of the school and local community. These guidelines guarantee that all new schools and school upgrades align with the NSW Department of Education's vision and can deliver the Australian curriculum while allowing the school community to contribute ideas towards making the school their own.

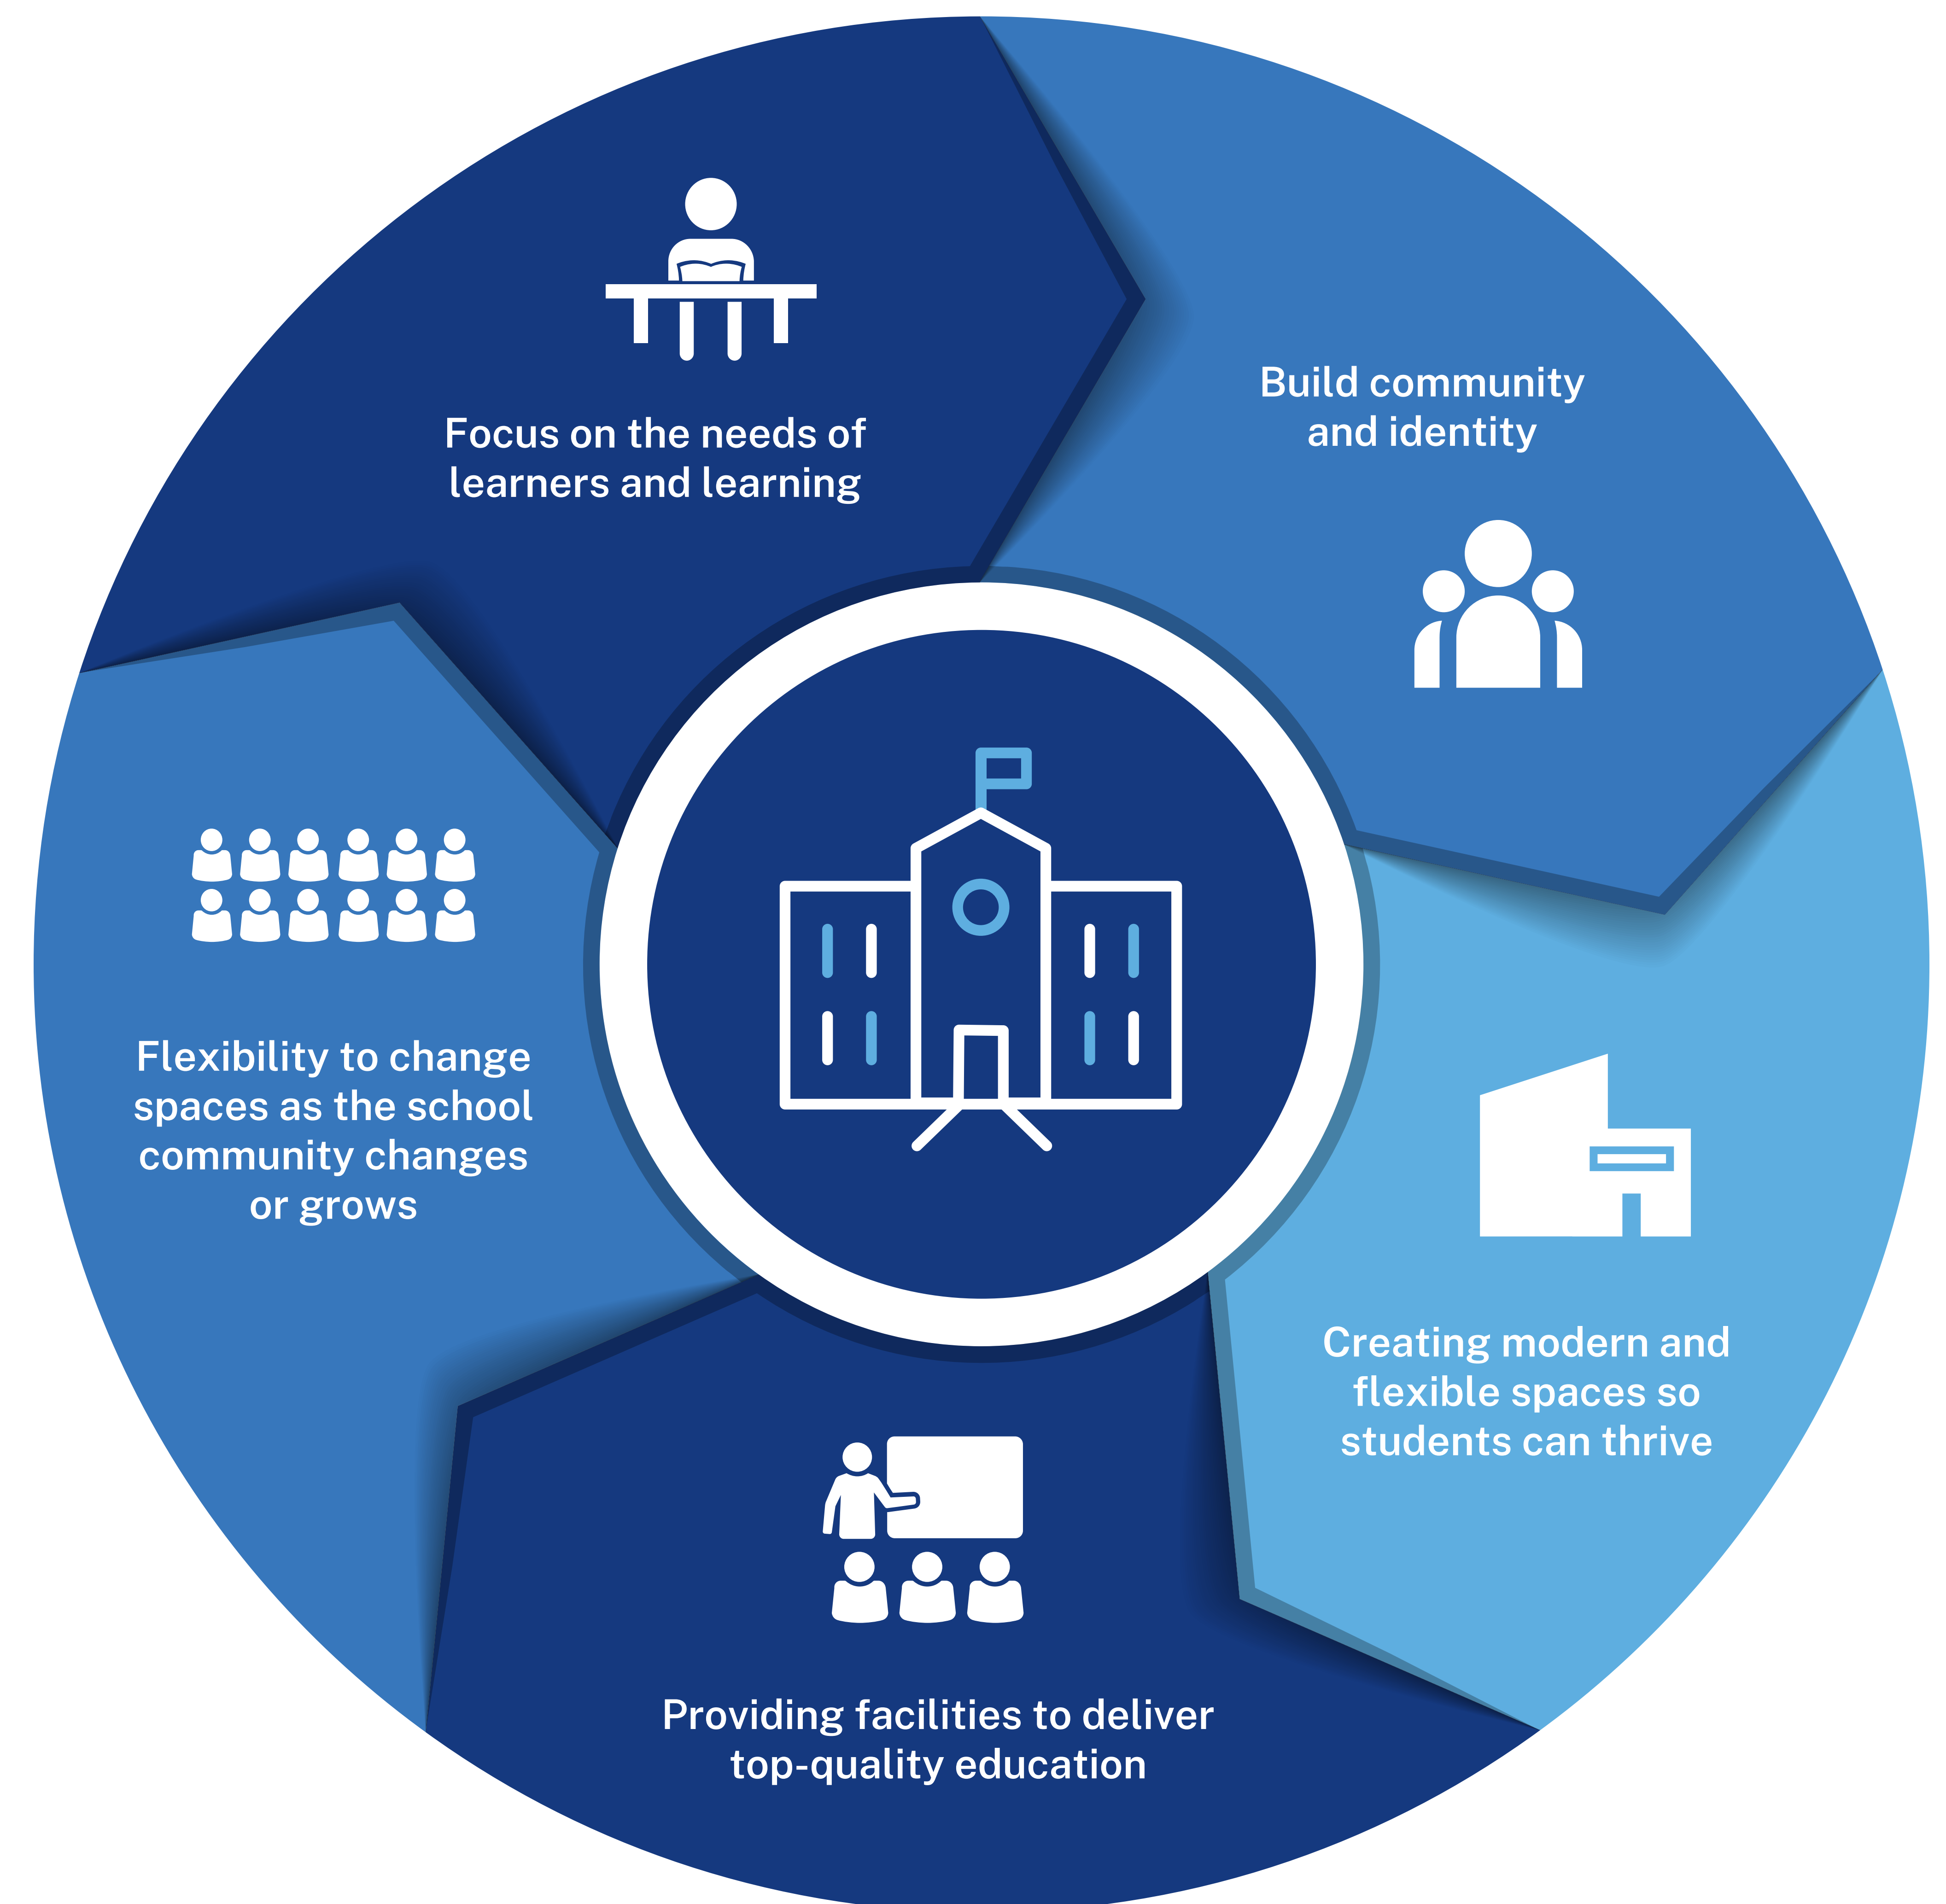

## Want to know more about how we build and upgrade schools?

We design and deliver schools to suit the individual needs of the local school community. We harness opportunities and solve challenges. As a result, no two schools are exactly the same.

What remains consistent is school infrastructure that empowers teachers to prepare students with the skills and capabilities they need to thrive in a rapidly changing and interconnected world.

Take a look at some of the upgrades we have delivered and see how these varied spaces support teaching and learning.
