Bomaderry High School upgrade

Information Pack | February 2024

As part of the NSW Government's plan to rebuild essential services, the 2023-24 Budget is delivering a record \$8.8 billion for new and upgraded schools. This targeted investment in growing communities will ensure working families get access to a world class public education.

The upgrade to Bomaderry High School will include fit-for-purpose learning spaces and core facilities. The project will deliver:

A new building with administration facilities and Technological and Applied Studies (TAS) classrooms

Refurbished classrooms

Refurbished staff rooms

Upgraded toilets

Accessibility improvements

Pedestrian safety improvements

Project overview

A new single-storey building will provide a new entrance for the school, as well as house Technological and Applied Studies (TAS) facilities for food technology and a wood and metal workshop. It will also provide new staff and administration facilities, and new student toilets.

Buildings A, B, D and E will be refurbished and reconfigured to improve the provision and quality of classrooms and facilities for science, visual arts, performance and fitness, as well as facilities for specialist support classes.

Connecting with Country

Guided by the principles of the NSW Government's Connecting with Country Framework, we aim to ensure that the strength, diversity and richness of local Aboriginal cultures and Custodianship of Country are respected, valued and embedded in the design of the new building.

We are currently discussing design options with our Connecting with Country consultant in partnership with local Aboriginal Knowledge Holders and will share design initiatives once finalised.

Site plan

The site plan below shows the location of the new building and how existing buildings will be refurbished and reconfigured. It also shows the location for proposed pedestrian safety improvements.

Proposed pedestrian safety improvements

- Bus bay works:
 - extending the footpath boarding area
 - line marking the bus bay
 - new waiting area in front of the new building.
- New crossing across Cambewarra Road to the school driveway
- New crossing across Lyndhurst Drive

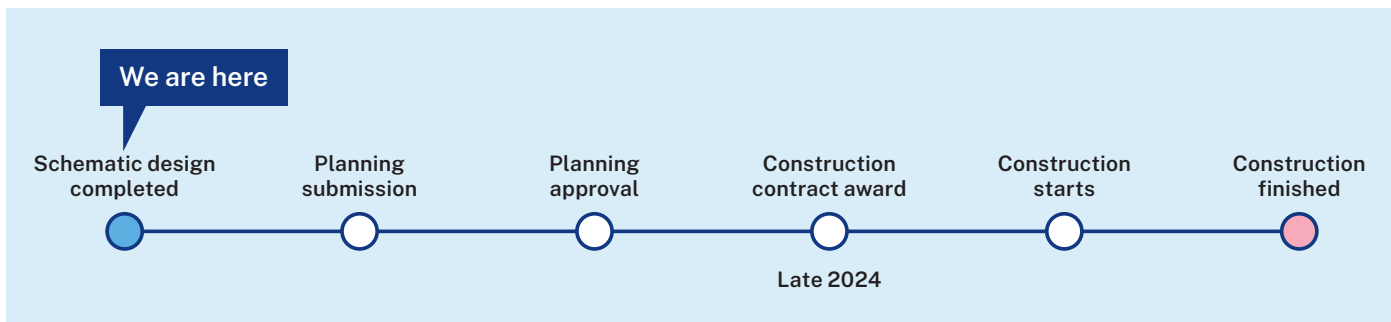

Next steps

We will start the tender process to appoint a builder for the upgrade works. We will also seek planning approval for the upgrade works via a complying development certificate (CDC).

Complying development is a combined planning and construction approval for straightforward development that can be determined through assessment by an accredited certifier.

Project timeline

The timeline above is subject to change. We will finalise a delivery program and project completion date once the construction contractor has been appointed and planning approval has been received.

Stay informed

We look forward to sharing more information with you as the project progresses. You can stay informed by regularly visiting the project web page and you can contact us via email or phone if you have any questions or feedback about the upgrade.
