## Project update

June 2021

### Investing in our schools

The NSW Government is investing \$7.9 billion over the next four years, continuing its program to deliver 215 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

### Project overview

We are upgrading Brooke Avenue Public School to deliver new and improved facilities to support the growing student community. The upgrade will deliver:

- four innovative and flexible learning spaces
- two withdrawal rooms
- a practical activity area
- a new sports court.

### Progress summary

Construction is underway and progressing well. The old sports court has been removed and all in ground services were installed.

The concrete slab has been poured at the site of the new building and construction is progressing.

The sports court proposed location has been changed to retain as much open green space as possible, this was identified as an important factor by the school community through the project reference group.

### Next steps

- Construction of new building will continue to progress.
- Start construction of the sports court.

### Completion update

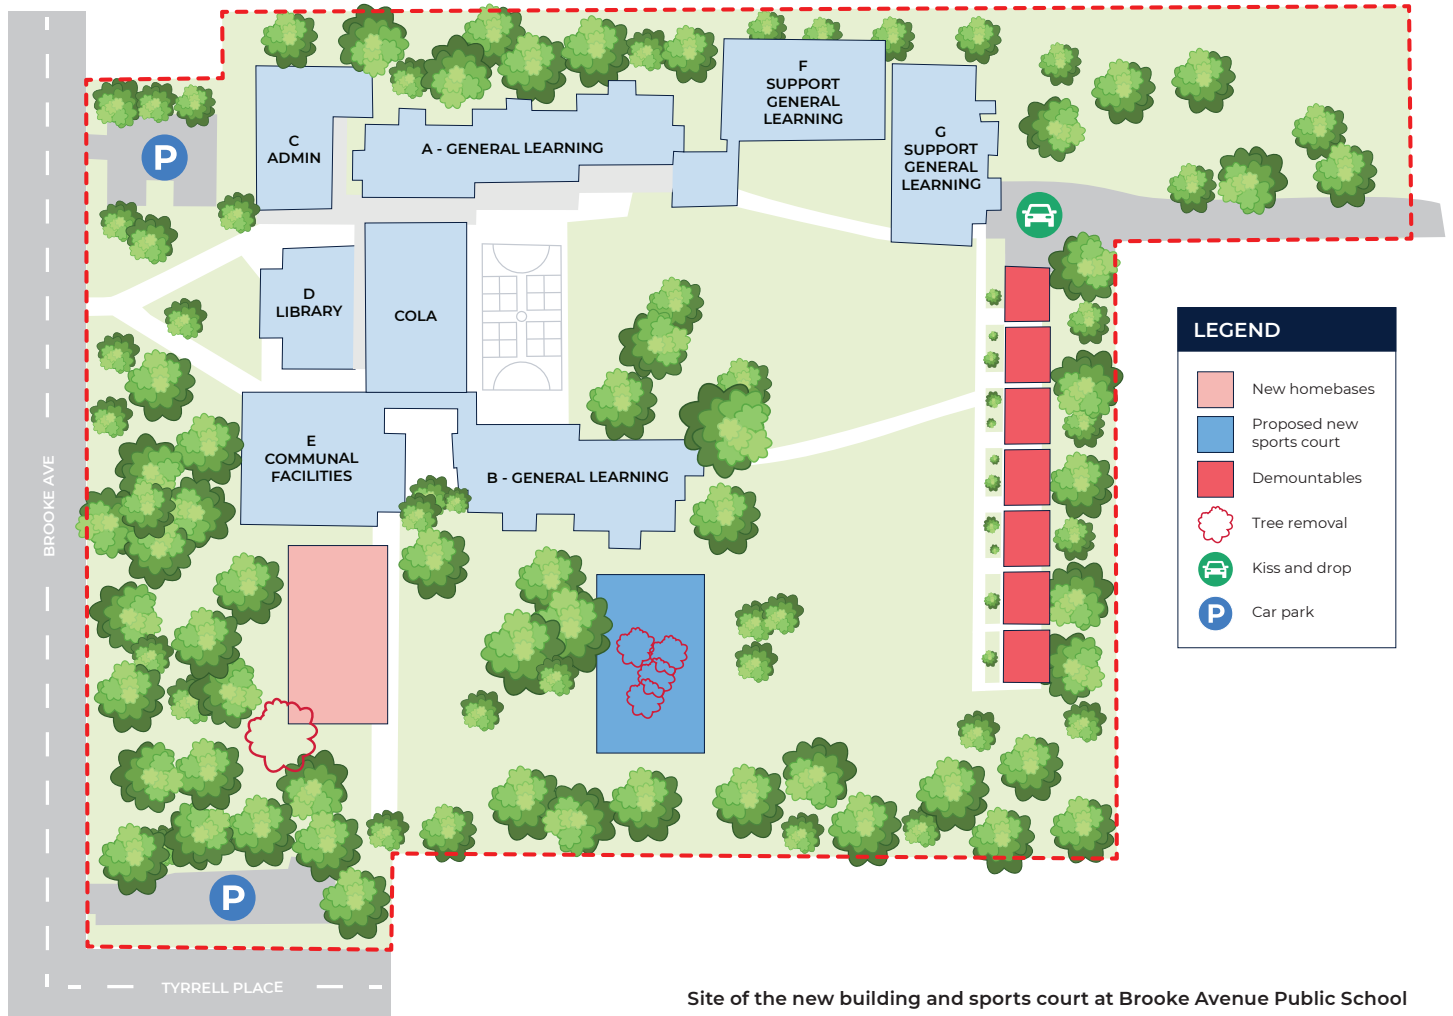

Completion date has been revised to reflect the project progressing ahead of schedule, the works are estimated to be completed in late 2021.
