

# Project overview

Planning is underway for the establishment of a new high school in Bungendore to accommodate more than 450 students and to upgrade facilities at Bungendore Public School.

The new high school will have modern facilities with 24 flexible learning spaces including 3 support learning spaces, a library, hall, school canteen, playing courts, an agricultural plot, and kiss and drop zones.

Learning spaces will be built to enable teaching of English, Mathematics, Science, Technologies, Human Society and its Environment (HSIE), Personal Development, Health and Physical Education (PDHPE), Creative Arts, Languages, Vocational Education and Training (VET), and Agriculture.

As part of the high school project there will also be new community facilities, additional local car parking and updated storage facilities for the scout hall.

Bungendore Public School will also receive upgrades including to the existing playing field, a new amenities block and new field lighting. Additional teaching spaces are also to be created at Bungendore Public School.

# Flexible learning spaces

Contemporary learning and teaching prepares students for a diverse and interconnected world. We are evolving the ways we teach our students new skills valued by a changing workforce, understand different ways students learn and support new ways of interacting with information through technology.

Flexible learning spaces are designed and equipped to support contemporary learning and teaching.

## What makes a flexible learning space?

### Learning space

- Different zones (areas of a building or floors) are designed to support a range of activities sometimes grouped by subject area
- Varied furniture allows for student choice, comfort and flexibility
- Spaces are flexibly connected allowing students to work in varied group sizes
- Connection between indoor and outdoor learning spaces

### Organisation

- Movement is encouraged for students and teachers to collaborate and interact
- More than one teacher may be available to students within the learning environment
- Students learn in classes, small groups or individually

### Teaching and learning

- Learning is personalised
- Learning is connected across different subject areas
- There is a focus on creativity and innovation with students prototyping, testing and using technology in creative ways

### Technology

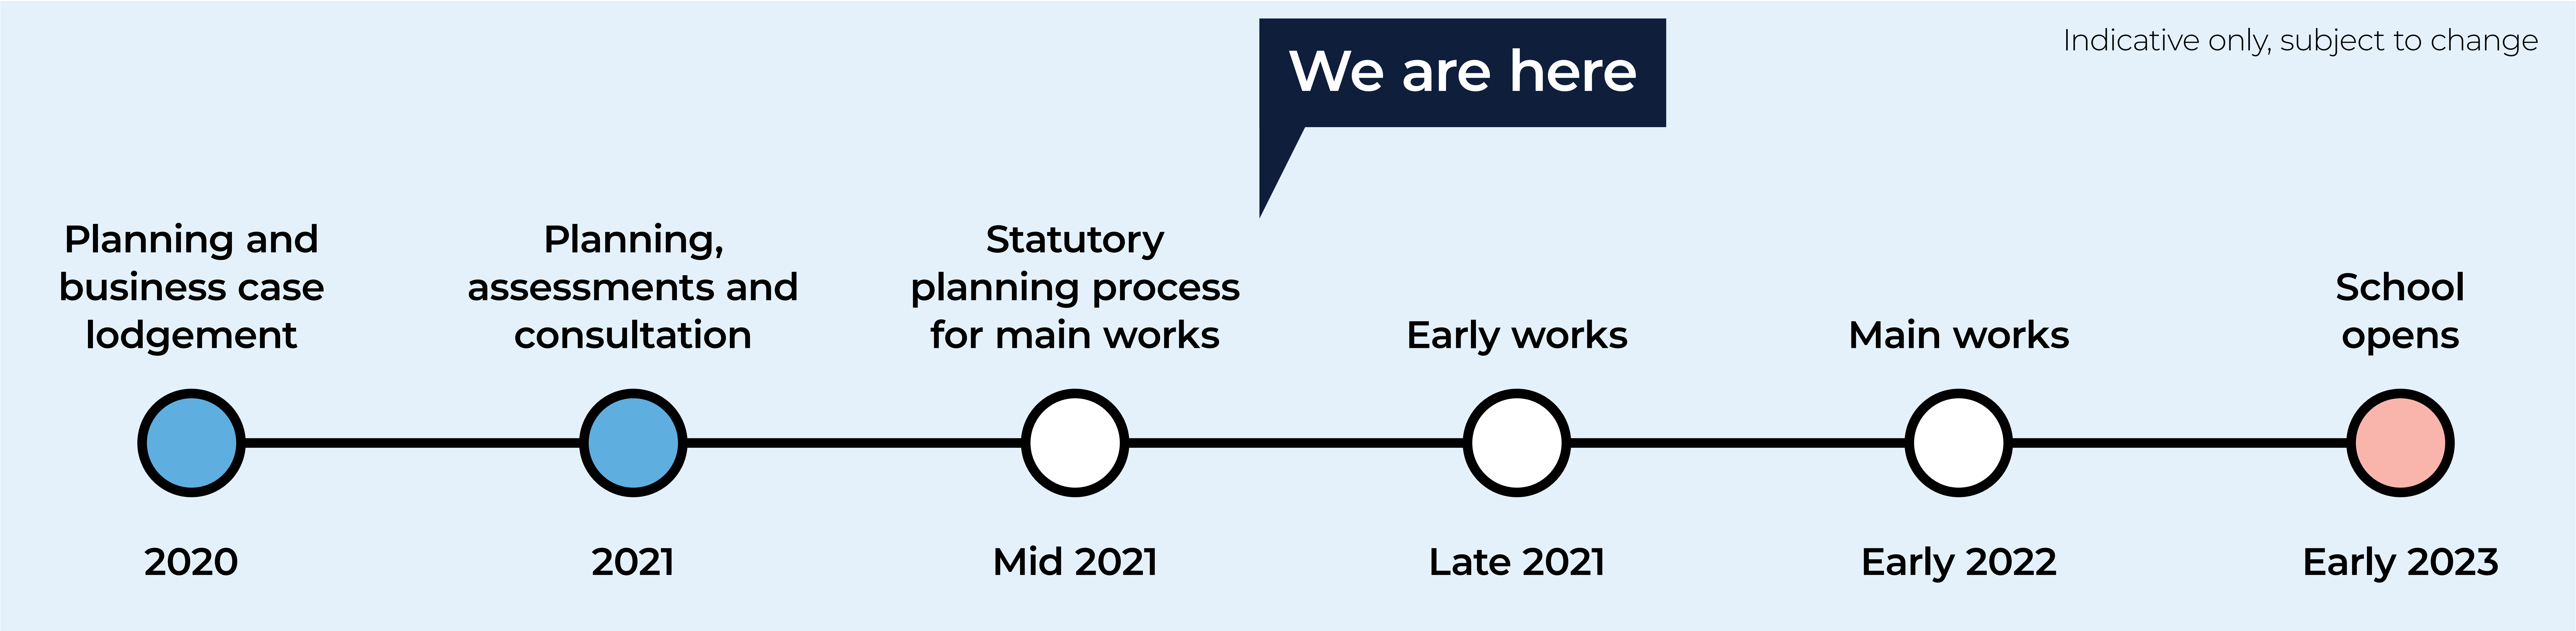

- Technology is integrated into spaces to extend learning opportunities
- WiFi is available everywhere including outdoors
- Specialist equipment is available for students to innovate, communicate and create

# Timeline

## What's next?

We will continue to work with key stakeholders so that we can deliver high quality education infrastructure for the local community. The Environmental Impact Statement and the State Significant Development (SSD) application have been lodged with the Department of Planning, Industry and Environment (DPIE), and will be on public exhibition. The community and other stakeholders can formally provide comments. Construction work can start on the high school site after the SSD application is approved. The community is encouraged to provide feedback via DPIE's Portal. Download the Information Pack for details and watch the project video in this Virtual Information Room to experience the new school and surrounding area.

We look forward to sharing more information with you as the project progresses. In the meantime you can stay informed by regularly visiting the project web page and you can contact us via email or phone if you have any questions about the new high school.
