

Cammeray Public School

Project update | March 2025

Investing in our schools

As part of the NSW Government's plan to rebuild public education, the 2024-25 Budget is delivering record education funding, including \$8.9 billion for new and upgraded schools. This targeted investment will ensure growing communities get access to a world-class public education.

Project overview

The upgrade to Cammeray Public School will replace demountable buildings with 4 new permanent classrooms and 2 practical activities areas in a new two-storey building. The new building will include a lift and covered walkways.

Progress summary

We have completed the design of the new building, and the construction tender is being prepared. The tender will be released by mid March 2025, and we anticipate that the contract will be awarded to a builder by mid 2025.

The upgrade works are permitted without planning consent; however, the likely impacts of the proposal must be assessed in a Review of Environmental Factors.

Stage 1 playground update

Construction of the new playground began during the summer holidays. The contractors have cleared the site, installed some sandstone paving, steps and started the timber work. Work to install the playground equipment has also started. We expect the playground to be completed by mid 2025.

Next steps

We will continue to work with the school through the Project Reference Group (PRG) to finalise the internal finishes, furniture and landscaping for the upgrade.

Once the builder has been appointed, they will work on a detailed design for the upgrade and establish a construction timeline. We anticipate construction to begin in mid 2025 and will provide a more precise schedule once the builder has been appointed.
