Inner walkway

Sports field

Early works have been completed, including the CHS link road from Dunmore Avenue to Blenheim Road and adjoining CHS staff car park, CWPS Buildings A and B have been refurbished, and the multipurpose play courts at CHS have been upgraded.

Masterplan

The master plan for the upgrades to both schools has been configured to keep as many trees as possible, to ensure privacy and minimal visual impacts to the neighbours, while carefully placing the buildings to provide the necessary classrooms for the school population.

-  Proposed buildings
-  Under separate planning pathways
-  Retained buildings

Carlingford West Public School

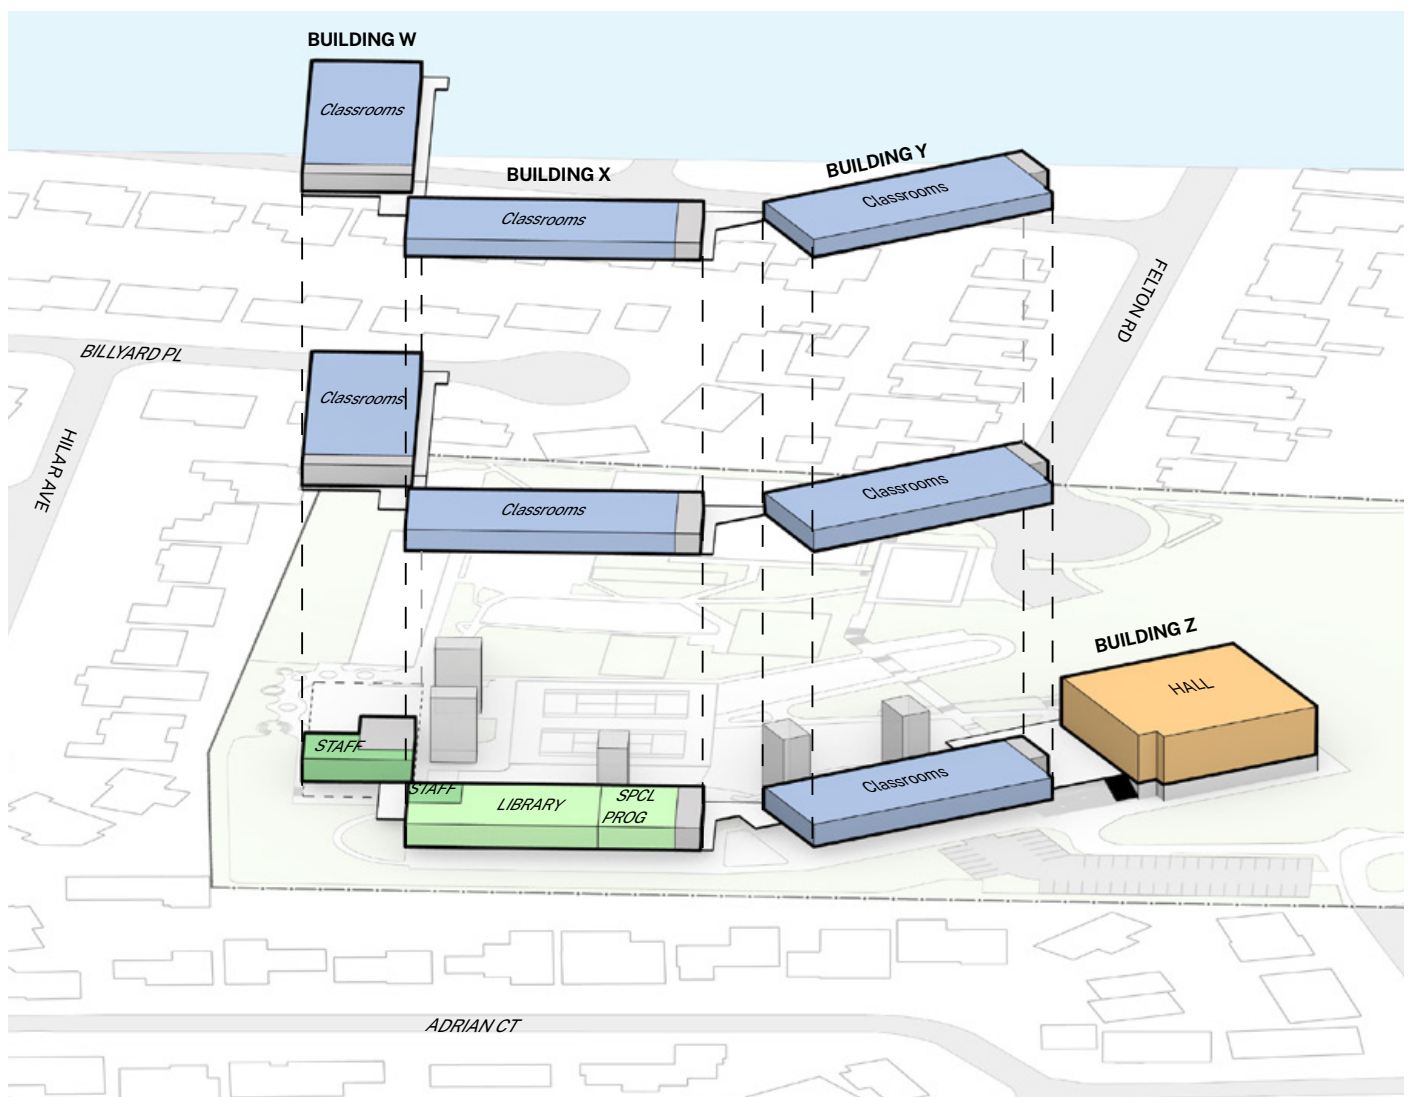

The upgrade to CWPS will accommodate a total student population of 1,610 and includes the construction of four new buildings: one two-storey (building W), two three storey (buildings X and Y) and the hall which will be a single storey building (building Z).

These new buildings contain a variety of uses including 56 new classrooms, a new library, a hall, canteen and amenities.

The new library, canteen and hall are on the ground floor to allow for easy connection with the community and potential use of some facilities outside of school hours.

Classrooms are flexibly connected allowing students to work in varied group sizes and move between indoor and outdoor learning spaces.

The works also include construction of a new kiss and ride off Felton Road West and staff carpark.

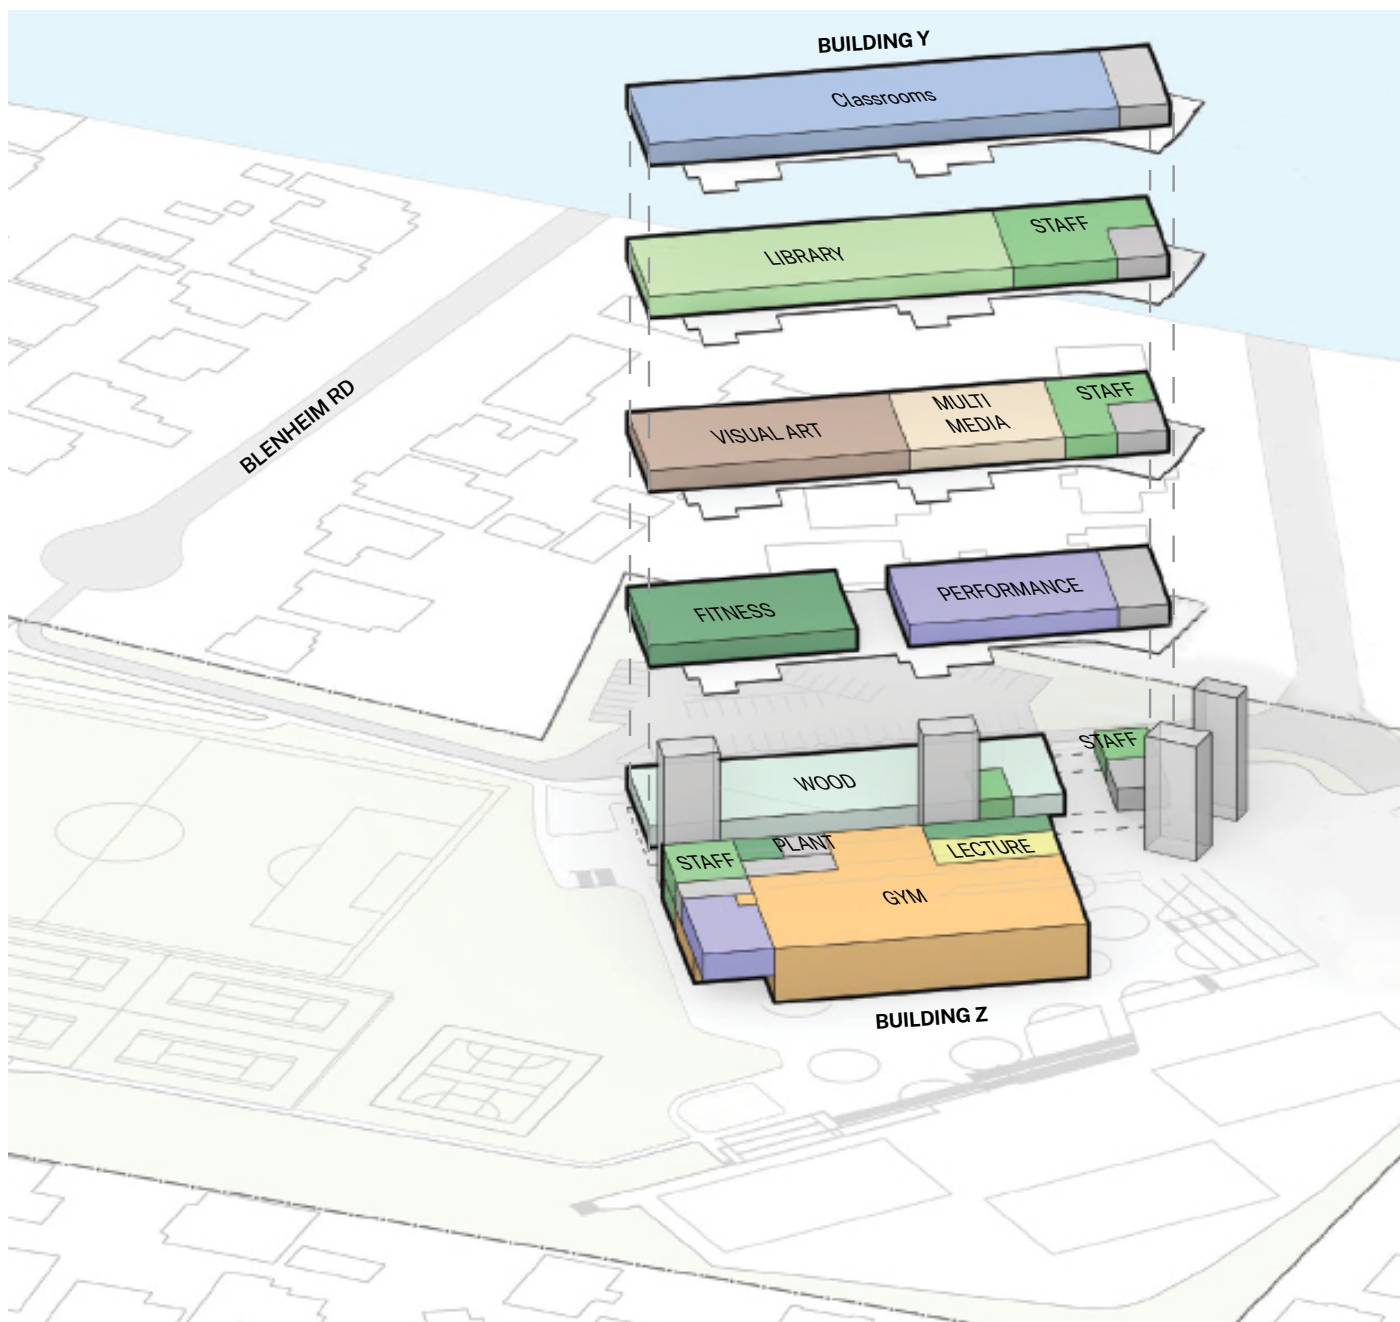

Cumberland High School

The upgrade to CHS will accommodate a student population of 1,500 and includes the construction of two new buildings: one five storey (building Y) and one single storey (building Z). Buildings A, D, E and G will also have some learning and administration areas refurbished.

There will be 77 new and upgraded classrooms, labs and workshops. Administration, performance and fitness facilities are on the ground floor and level 1 to allow for easy connection with the community and potential use of some facilities outside of school hours.

The current data indicates that catering for 1,500 students at CHS meets the population demands.

Active modes of travel

In order to encourage and prioritise active transport, public domain improvements have been developed in consultation with City of Parramatta Council and Transport for NSW.

For cyclists, bicycle storage and end-of-trip facilities are included.

Public transport is a substantial part of the CHS transport strategy and will be addressed through the provision of a new bus link road from Dunmore Avenue to Pennant Hills Road, replacing the existing cul-de-sac turning circle. The bus link will operate as a one-way link for buses only (closed to public access and closed out of hours) and will be a left-only exit onto Pennant Hills Road.

What happens next?

Construction sites have been established at both schools, as shown on the adjacent map. Work has started on the upgrades this month.

Frequently asked questions

When will the upgrades be complete?

The upgrades at both schools will be complete early 2026.

Why is the future school capacity for CWPS lower than current enrolments?

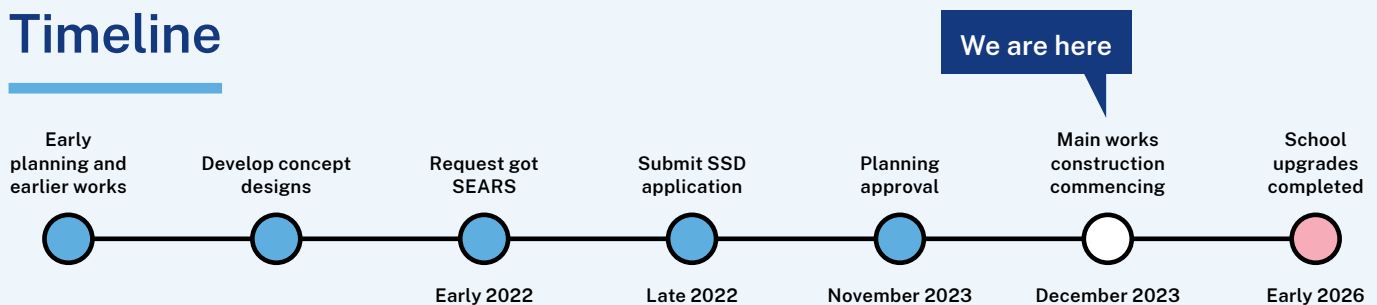

Effective Day 1 Term 1 2022, the intake area for Carlingford West Public School was adjusted for all new enrolments, to better balance enrolments across our schools.

As a result of the 2022 intake area adjustment, student numbers at CWPS are expected to decline progressively over the next few years. Intake area reductions can take up to seven years for the full impact to be realised, as students can remain enrolled and retain the right to enrol siblings where the Department makes an intake area change.

What are the construction hours going to be?

The construction hours are included in the consent conditions as part of the SSDA and are 7 am to 6 pm Monday to Friday and 8 am to 1 pm Saturday. Works will only be conducted between approved hours. Workers may enter the sites prior to construction hours, so that work can begin as soon as permitted. They will keep noise to a minimum to avoid disturbing our neighbours.
