

Carlingford West Public School

Works notification

4 May 2021

Early investigation work taking place at Carlingford West Public School

We are planning an upgrade at Carlingford West Public School to support the growing student community.

As part of standard due diligence practice for a construction project, qualified contractors will be testing for material that may need to be remediated before or during construction.

On Saturday 8 May 2021 our crews will be taking samples of the walls and ceilings in Block A (administration building), Block B (library) and Block C (ground floor classrooms) to test for a range of materials, which includes asbestos and lead.

While previous samples have shown that no asbestos has been found on the school site, as a precaution, the work will be conducted in line with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

We will keep you informed if any material is found which requires removal.

Working hours

Due to the location and nature of works inside school grounds, these activities will take place on a Saturday 8 May 2021. The working hours will be from 8:00am to 1:00pm. No work will take place on Sundays or public holidays.

Thank you for your patience while we undertake this early investigation work to help deliver this important school infrastructure.
