

Carlingford West Public School

Works notification

7 June 2021

We are planning an upgrade at Carlingford West Public School to support the growing student community. As part of this upgrade, and to minimise disruption to school operations during construction, School Infrastructure NSW will establish a temporary primary school for Carlingford West Public School students.

The temporary primary school will be located on Carlingford West Public School's southern play space and the northern section of Cumberland High School's oval.

Site establishment

On Monday 21 June 2021, work will begin to establish the temporary primary school site. This work will include installation of temporary fencing, site sheds and compounds, plus connecting temporary utility services. Site establishment is anticipated to take up to a week, weather permitting. Delivery of the temporary learning space modules is anticipated to start on Wednesday 23 June 2021.

To carry out this work, construction contractors will be using Dunmore Avenue as an entry point as it has sufficient width to ensure the safe delivery of temporary buildings.

Construction of the temporary primary school is expected to be completed in late 2021. We anticipate the temporary school will be ready for occupation in Term 4 2021.

Health and safety

The health and safety of students, staff and the community is our highest priority.

Site fencing and hoarding will be installed around the construction site as a safety measure to provide a physical barrier between construction and the two schools. Traffic controllers will be in place to ensure deliveries are managed safely, with truck deliveries scheduled outside of school peak hours to limit impacts to surrounding roads.

Work hours

All work will be carried out during standard construction hours which are Monday to Friday 7:00am to 5:00pm, and Saturday 8:00am to 1:00pm. No works will take place on Sundays or public holidays, unless notified.

The map overleaf indicates a general site footprint for the temporary primary school during construction and once it is in operation. We will provide the community with regular updates throughout construction of the temporary school.
