

Castle Hill Public School

Welcome Pack – February 2025

New teaching building

Welcome to your upgraded school

We are excited the first stage of the Castle Hill Public School upgrade is complete and ready for students and staff to use. The new facilities include:

3 storey teaching building with 36 classrooms, and seminar spaces

a new hall with canteen

covered outdoor learning area (COLA)

landscaping to the areas next to the new buildings

refurbishment of the administration building's ground floor

converting the temporary administration facilities in Building B to 3 permanent facilities for specialist support classes

Work will continue on the following areas:

- refurbishing level 1 of Building A (administration)
- sports court construction and remaining landscaping works following demountable removal.

This work is expected to be completed by mid 2025.

Thank you for your patience during construction.
We are thrilled to deliver this project for the school community.

Message from your Principal

Welcome to our school!

Castle Hill Public School's new building upgrades provides our students and teachers with a modern learning environment and outstanding facilities throughout the school.

Our new teaching block, featuring 36 classrooms and additional adaptable spaces equipped with advanced technology, will support various teaching styles and learning needs while facilitating enhanced student engagement and collaboration.

Our new school hall and COLA will provide versatile areas to support the wide range of activities our school offers.

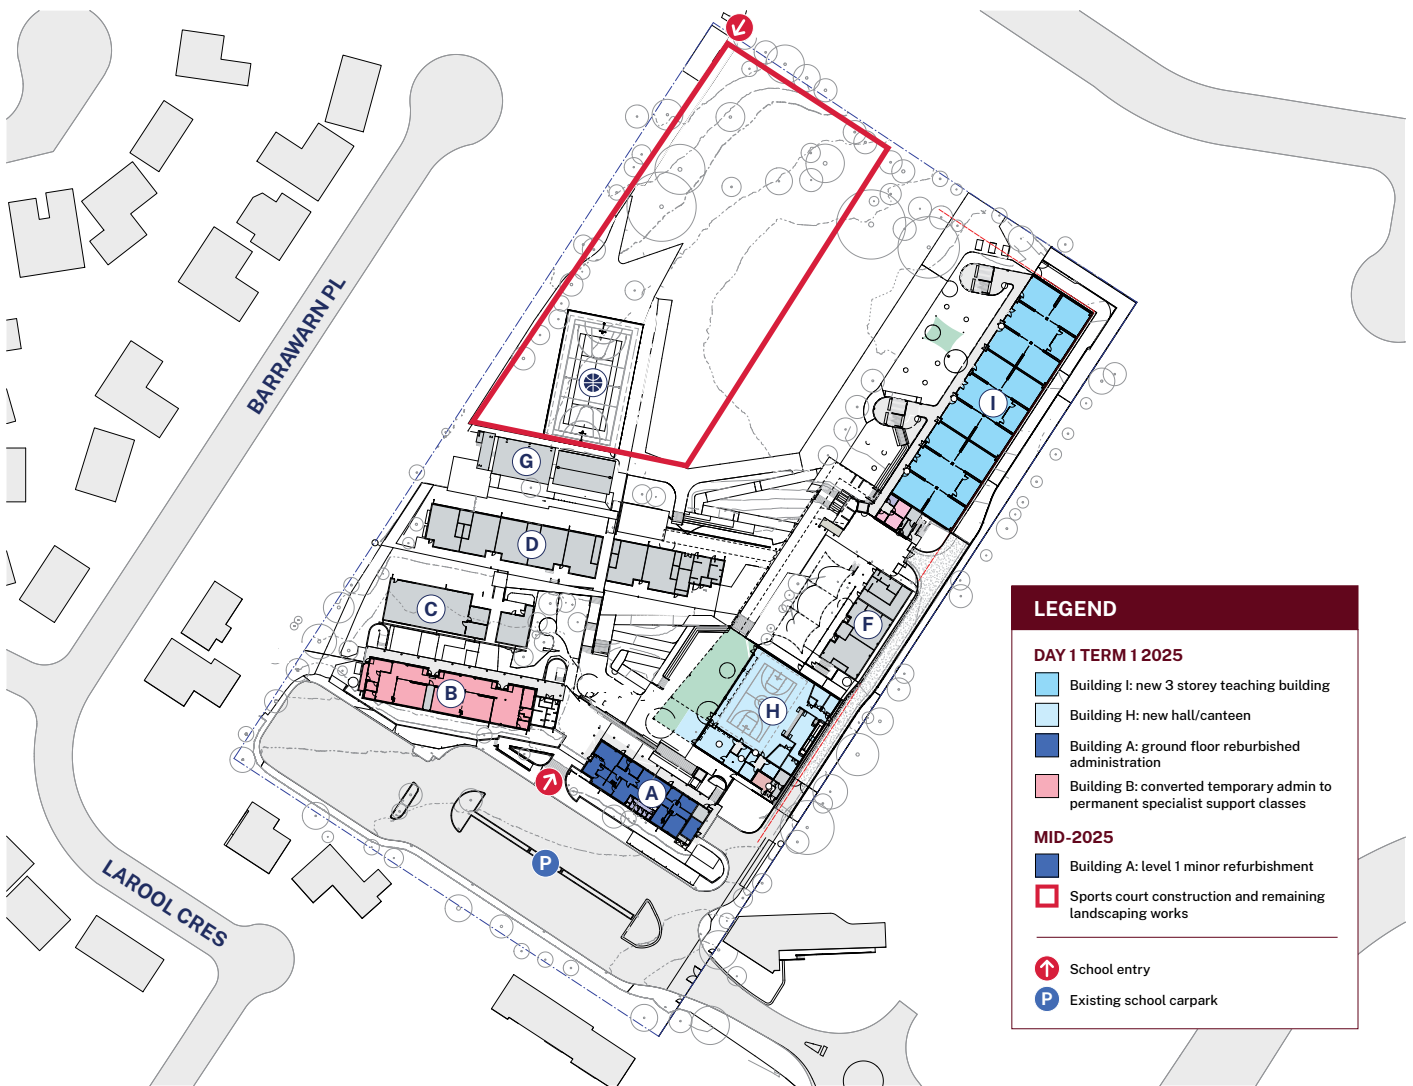

The Castle Hill Public School community is excited to have these new, first-class facilities available to us. They will assist in providing our students with a well-rounded education and prepare them for future success.

Craig Oliver

Principal

Castle Hill Public School

Did you know?

The new roof-mounted solar panel system provides electricity across the whole campus and significantly reduces the peak demand generated by the new buildings.

Rainwater is harvested and stored in a tank below the new hall's COLA. The rainwater will be reused for irrigation and toilet flushing in the new buildings.

The new hall stage includes curtains and lighting to elevate performances and presentations.

Building better schools

We are continuously improving the way we build schools.

Later this year we will share a survey link about the school upgrade.

Your feedback, ideas and suggestions will help inform the way we plan, design and build future schools so that they best support high quality teaching and learning.
