## Works notification

June 2022

### Tower crane installation at Chatswood High School

On Wednesday 15 June and Thursday 16 June between 7:00am and 5:00pm, a second tower crane will be installed at Chatswood High School between the construction zones of Building T and Building Q, weather permitting (see map). In the event of rain, the installation may take place across two days on either Friday 17, Saturday 18 or Monday 20 June.

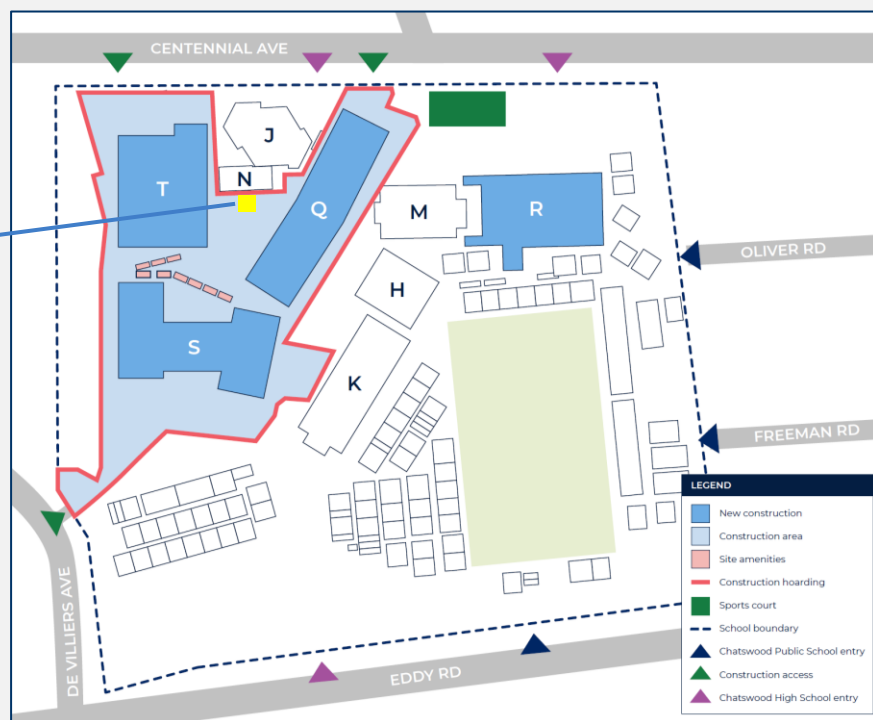

The tower crane will assist with the movement of materials on site.

An oversized vehicle will deliver the tower crane through the eastern Centennial Avenue vehicle entrance and traffic control will be in place. The delivery will likely take place before 7am in order to adhere to road regulations for oversize vehicles.

Appropriate controls and monitoring measures will operate while the crane is on-site. Crane loads are restricted to lifting within the perimeter of the construction site only.

When not in use the crane will operate in 'free slew', which is a safety measure that allows it to move freely in the wind when not in use. The crane installation will be signed off by a structural engineer ahead of being used for construction and movement of materials and will also be subject to daily pre-start inspections prior to operation.

Thank you for your patience while we deliver this important school infrastructure.

Indicative tower crane location
