# Concord High School

Project update | June 2023

## Project overview

An upgrade is planned to deliver additional learning spaces, core facilities and to refurbish existing learning spaces at Concord High School. The project is in the planning stage and requires a business case to be approved to determine the full scope of the upgrade. Ongoing minor works projects and maintenance works are also underway.

## Progress update

The Development Application (DA) for the upgrade project was lodged with the City of Canada Bay Council on 20 June 2023.

Some of the minor works projects and maintenance works have been completed, including the covered shade structure and seating for the sports oval and refurbishment of the library toilets Term 1, and the roof replacement on Block D in Term 2. The LED lighting upgrade is now complete.

A contract has been awarded for the installation of air conditioning. The delivery of this program has recently begun and will continue in the coming months.

## Next steps

The City of Canada Bay Council will review the DA before placing it on public exhibition on the Council webpage, anticipated July 2023. To view the DA once exhibited, you can visit the Council website and search DA2023/0135 at:

<https://canadabay-eplanning.t1cloud.com/Pages/XC.Track/SearchApplication.aspx>

Works will not commence until after the business case and DA are approved. We thank you for your patience while we continue planning for this important school infrastructure.
