

# Concord High School

## Works notification | 5 July 2024

A project is underway to upgrade Concord High School. The upgrade will provide additional permanent classrooms and core facilities across three new buildings, as well as upgrades to selected existing facilities.

To make way for the new buildings, the current school hall and canteen will be demolished. This requires temporary canteen and changeroom facilities to be installed.

### Temporary demountable installation Monday 8 July 2024

A mobile crane and multiple trucks will be required to deliver the temporary demountable facilities in pieces. The crane will be set up on Crane Street and will require the closure of a lane and foot path temporarily to allow trucks to park and ensure the safe operation of the crane. See the diagram below for all details.

This temporary lane closure will take place between the hours of 9:30am and 2:30pm. Crane Street will remain accessible from both directions. Pedestrians will be directed away from the closure.

Traffic controllers and signage will be in place on Crane Street and Burwood Road, from 9.30am to maintain the flow of vehicles and pedestrians through the lane closure and ensure the safety of the community.

Work to get the canteen building operational will take place during the school holidays on weekdays between the hours of 7am to 4pm to ensure it is ready for student use in Term 3. The temporary changerooms will arrive separately at a later date to be advised.

This work is taking place during the school holidays to minimise the impact on the school and wider community. We thank you for your patience as we work to deliver this new infrastructure.

In the event of inclement weather, the installation will occur as soon as possible after.
