Investing in our schools

The NSW Government is committed to rebuilding flood affected schools in the Northern Rivers region, ensuring we build back better with flood resilient schools for local students and local communities. Funding for the school projects has also been provided by the Infrastructure Betterment Fund, which is jointly funded by the Australian and NSW Governments through the Disaster Recovery Funding Arrangements.

Project overview

As part of this commitment, a project is underway to rebuild Condong Public School after it was extensively damaged during floods in early 2022. The project will deliver a raised and more flood resilient school for students and staff, with modern classrooms, a new library, canteen, administration spaces, and landscaping.

Progress summary

- We have completed the earthworks and installed the screw piles in preparation for the new school buildings. Work has now started on the ground floor amenities block.
- The Condong Public School building modules have been completed off site and are ready for delivery and installation.
- The first workshop with the school and local community members, was held on 26 June to inform the Heritage Interpretation Strategy for the new school.

Next steps

Now that the ground works and inground piling are completed, the next steps are:

- installation of the flood resilient steel gantry, which is scheduled to begin in July;
- delivery and installation of the school building modules, which we expect to begin in August;
- school fit out for Information and Communication Technology (ICT) and services connection;
- landscaping.
