

Cranebrook High School

Welcome pack

Cranebrook High School upgrade

Welcome to your new learning spaces

We're excited your new school facilities are ready for you to use.
The upgrade to your school includes:

4 new flexible learning spaces

A seminar room

A new covered outdoor learning area (COLA)

Thank you for your patience during construction. We are delighted to deliver this project for the school community and hope you enjoy your new spaces.

Message from your Principal

Our school is on the lands of the Darug people and we acknowledge and pay our respects to elders, past, present and future. School buildings should be inspiring, comfortable and exciting places that encourage and foster learning for students. They should be places where students and their teachers and staff can work and learn to shape the future of individuals and our broader community. Our new buildings at Cranebrook High School provide students with an inspiring place to work, learn and grow into positive and productive citizens. This flexible learning centre will allow a variety of learning styles and activities, ensuring that we continue to meet the needs of our students well into the future.

Craig Dunne, Principal

New learning spaces

The new building K provides flexible learning and shared spaces, and is located next to the visual arts unit. All fittings, walls and furniture are designed to be mobile, ensuring flexible use of the space available. These learning environments feature space, furniture and technology that support greater collaboration and improved learning outcomes. Flexibility also helps teachers provide a broad range of learning experiences, empower students to learn at their own pace and support their learning in different ways.

Seminar room and outdoor learning

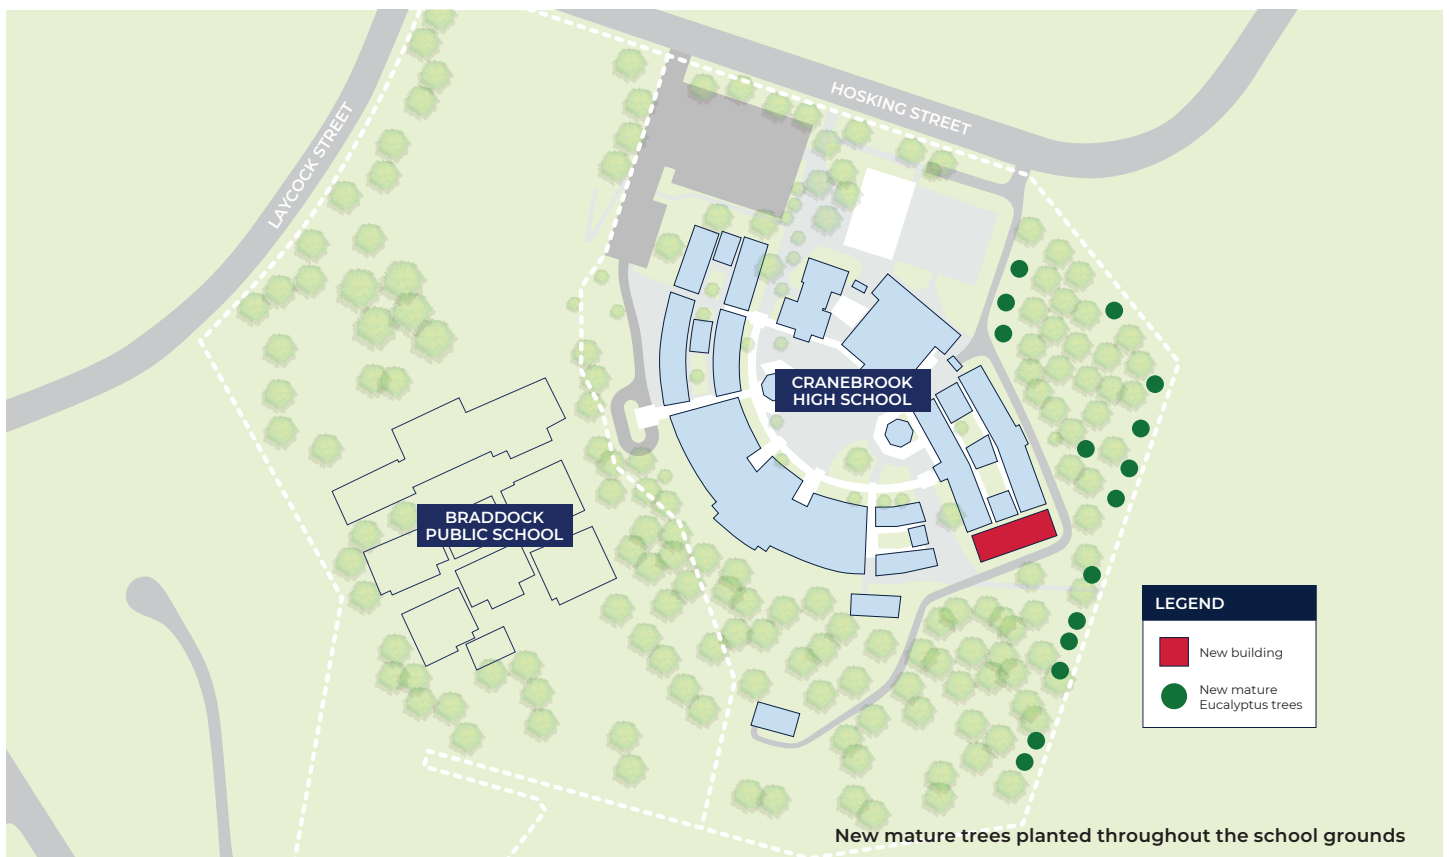

The new seminar room will be used by the school for meetings and smaller group activities. The new learning spaces are accessed via a new covered walkway which forms the roof of the new covered outdoor learning area (COLA). The new COLA can be used by teachers to host outdoor learning activities or for students to gather for lunch.

Benefiting our students

The new facilities will be used for specialised learning, for example to support agricultural classes due to its proximity to the school's farm. Being able to move partition walls in the general learning spaces provides the flexibility to use these spaces for close student tuition, provide additional student support as well as a space to hold more formal events such as art exhibitions.

As part of the landscaping for the upgrade, 15 mature Eucalyptus trees have been planted throughout the school grounds, adding to the abundance of green spaces that Cranebrook High School benefits from.

Thank you

We would like to thank you for your patience as we have delivered this upgrade. Your support and co-operation has been invaluable and made it possible for us to deliver these new facilities for the students and staff of Cranebrook High School.
