

An example of innovative learning spaces we are delivering for students across NSW

Croydon Public School

Project update

March 2020

Investing in our schools

The NSW Government is investing \$6.7 billion over four years to deliver more than 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

Croydon Public School

The upgrade at Croydon Public School will deliver:

- One new building with 18 teaching spaces
- Heritage building refurbishment for administration and staff
- A library, hall and special programs building refurbishment
- A new canteen
- Covered outdoor learning area (COLA) and walkway area.

Project summary

Stage 1 internal and external works are underway. Site establishment and demolition have been completed.

In late May 2020, staff and administration currently operating in Building A, will move into the newly refurbished heritage Building E.

On 25 May 2020, work will then start to upgrade Building A, commencing with the ground floor refurbishment in order to maintain access to the school library.

At the same time, external works for Stage 1 are underway which will impact various parts of the school (see overleaf for more detail).

The Stage 2 main works Development Application (DA) has been approved by Burwood Council and a tender for construction is in progress. We expect to appoint a contractor in 8 weeks and to start these works in mid 2020.

Stay Informed

We will continue to share construction updates and information as the project progresses. You can stay updated on the project through our website or using the contact details provided.
