

Curl Curl North Public School

November 2018

Construction is due to start in early 2019 on the Curl Curl North Public School upgrade. The project will deliver new facilities and innovative learning spaces.

Artist's impression of upgraded Curl Curl North Public School

The Curl Curl North Public School project will provide:

40 new
permanent
teaching
spaces

a new
hall

a new
library

a new
administration
building

a new covered
outdoor
learning area
(COLA)

upgrade
to external
play area

The NSW Government is spending \$6 billion over four years to deliver more than 170 new and upgraded schools. A further \$160 million has also been invested as part of the record \$747 million maintenance investment announced last year. This is the largest investment in public education infrastructure in the history of NSW.

Staged delivery

Site establishment for the redeveloped school is due to start in early 2019. The project is being delivered in three stages.

Stage 1

- 40 new permanent teaching spaces
- a new library
- an upgrade to administration facilities

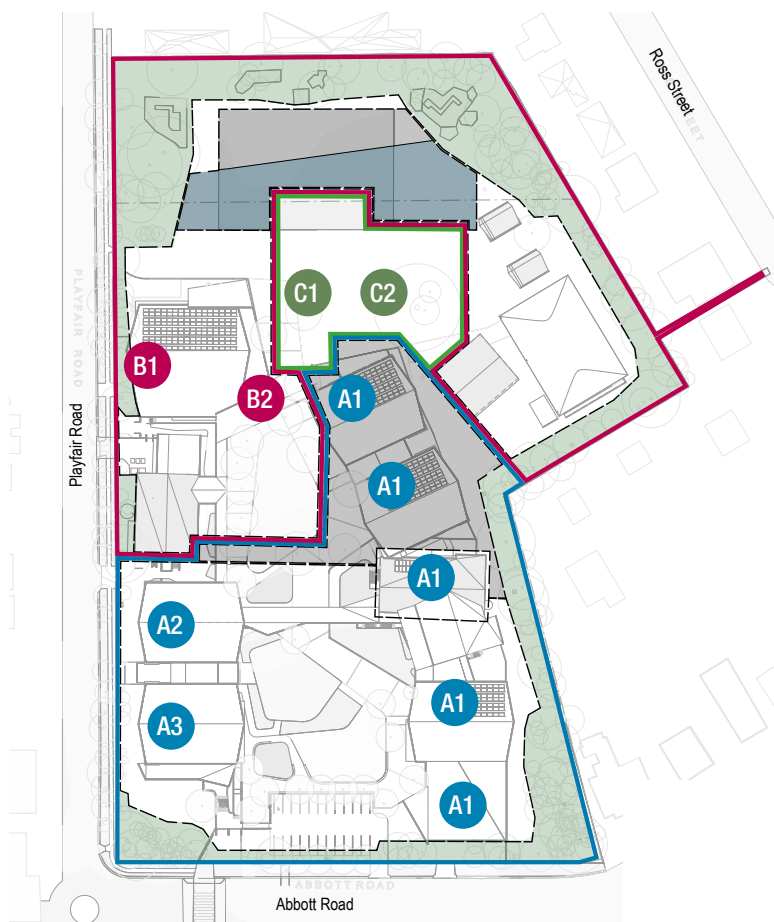

Stage 2

- a new hall
- an upgrade of external play areas

Stage 3

- existing hall is demolished
- final landscaping

Stage 1 is scheduled to be delivered for the start of Term 1, 2020 with Stage 2 to commence after this. This staged approach is required so that the temporary classrooms can be removed from site for the construction of the new hall to commence.

STAGE 1

- A1** 40 new permanent teaching spaces
- A2** A new library
- A3** Upgrade to administration building

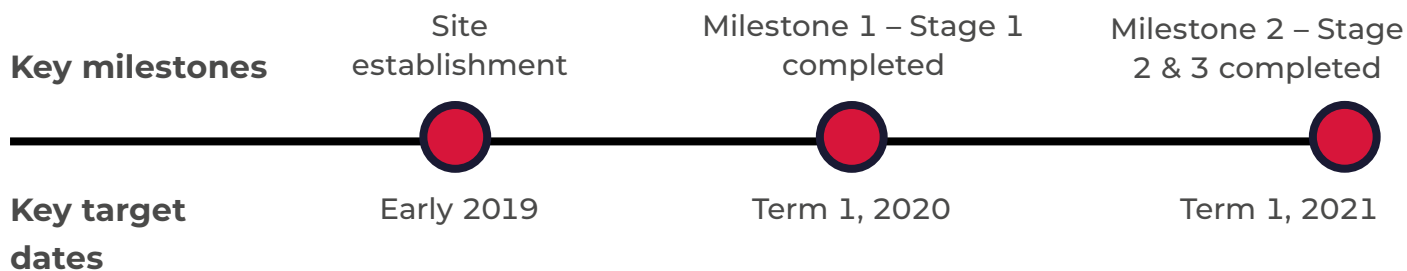

STAGE 2

- B1** A new hall
- B2** Landscaping and an upgrade to external play areas

STAGE 3

- C1** Removal of existing hall
- C2** Final landscaping

Indicative timeline

Frequently asked questions

When is construction expected to be completed?

Site establishment is due to start in early 2019 with main construction works for Stage 1 activities due to commence shortly after.

Stage 1 is forecasted for completion for Term 1, 2020 with Stages 2 & 3 forecasted for completion by Term 1, 2021.

How will traffic be managed during construction works

Construction contractors will enter the site via controlled entryways and will park away from the school site to minimise the impact on traffic and parking. School bus stops and kiss and drop areas will not be affected.

Will there be changes to parking during construction?

During Stage 1 construction, the existing car park will be closed. A traffic management plan will be put in place to minimise any possible impact to resident parking. Kiss and drop areas will not be affected.

Are any gates/entries to the school being closed off during construction?

The entry to the south of the school site on Abbott Road will be temporarily closed during Stage 1 construction. Wayfinding signs will be put in place to direct pedestrians. All other existing entries to the school will be maintained.

How will noise and dust be managed?

All works will be completed in accordance with the conditions of the development approval. A construction management plan will be implemented to minimise any possible impacts or disruption for local residents. This will include the erection of

hoarding and shade cloth to reduce noise and dust impacts.

What safety measures are being put in place?

Temporary fencing will be erected around the construction areas to ensure the safety of staff and students.

Deliveries will be scheduled for outside of school drop off and pick-up times, and traffic controllers will be on site to manage contractor deliveries.

Will the removal of asbestos be required?

The health, safety and well-being of students, staff and the community is our highest priority. Asbestos has been identified at site and a remediation action plan has been developed.

Any remediation works will be carried out by licensed contractors and occupational hygienists as required. It will be managed in strict accordance with all applicable legislation, policies and guidelines.

How will we be notified about construction updates throughout the life of the project

We will continue to share construction updates and project information with the community as the project progresses. We will provide information through information booths, project updates, our website and school newsletters.

Keeping you updated

We are committed to working with our school community and other stakeholders to deliver the best possible learning facilities for students.

We know the decisions we make will have a direct impact on our students, parents and carers, our staff and the local community.

We will continue to update the school and local community as the project progresses.

Your feedback is important to us. For more information, questions or to make a comment:
