

Darlington Public School

Works notification

23 August 2021

A project is underway at Darlington Public School to deliver new facilities including learning and teaching spaces, a hall, a library, administration and staff facilities, a canteen and covered outdoor learning areas (COLAs).

Mobile crane installation

As part of main works construction which is currently underway, we will be establishing a temporary mobile crane on Darlington Lane, the road which runs to the north of the school site (see map overleaf).

The crane will be installed in the small car park on Darlington Lane. Installation and operation of the crane is expected to take place intermittently between 8 and 24 September 2021, weather permitting.

The crane will assist construction works and the movements of materials on the northern part of the construction site.

No loads will be lifted over the operational school, the general public or nearby neighbours.

Darlington Lane will remain open, with traffic management in place for safety and to mitigate any disruption caused by the mobile crane.

The mobile crane installation or operations is not expected to impact students attending school or the Out of Hours School Care operating at Darlington Public School.

Concrete pours

Works to pour the concrete slabs for the new school building at Darlington Public School began in late April 2021. The timeframe for the concrete pours has been extended due to the construction pause, and is now expected to continue until mid-October 2021.

The work zone where the concrete pours are taking place continues to be separated from the Golden Grove Street road and footpath by barricades. There is safe pedestrian access along Golden Grove Street via the western side of the road, or via the B-Class hoarding adjacent to the work site on the eastern side of the road.

Traffic management will be in place to mitigate any disruption caused by concrete trucks making deliveries along Golden Grove Street. Traffic management will manage all pedestrian and vehicle traffic while the concrete pours are taking place.

We are here to make sure that work is completed safely and efficiently and we will minimise impacts on the community at every opportunity.

Thank you for your patience while we deliver this important school infrastructure.
