Eastwood Public School upgrade

Project update | June 2023

Project overview

A project is underway to upgrade Eastwood Public School. The project will deliver a new 'homebase' building with nine new permanent flexible learning spaces and a new toilet block to replace an existing amenity block, and will see the removal of temporary classrooms.

Progress summary

As communicated in our previous project update, Lloyd Group, who were engaged by the Department of Education to deliver the Eastwood Public School upgrade of the school hall at Lane Cove Public School, went into administration in April 2023 halting all construction.

A tender has been released to look for a contractor to finalise the remaining works and complete construction. This tender is now open and expected to close in July 2023.

Next steps

When the tender is closed, all applications will be assessed, and the most suitable tenderer will be appointed to the project. School Infrastructure NSW will announce the new contractor and any timeframes for construction restarting once this is confirmed.

Keep updated

We will continue to keep the school community updated as and when new information becomes available. All updates to the project will be shared on the project page for Eastwood Public School in the School infrastructure website. The page can be accessed in the following link: <https://www.schoolinfrastructure.nsw.gov.au/projects/e/eastwood-public-school-upgrade.html>
