# Eastwood Public School

## Project update

June 2021

### Investing in our schools

The NSW Government is investing \$7 billion over the next four years, continuing its program to deliver more than 200 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

### Eastwood Public School project overview

Plans have been approved for the NSW Government's upgrade at Eastwood Public School.

The project will deliver nine new permanent innovative and flexible learning spaces in a new home base building.

The old toilet block will be demolished and replaced with new facilities.

Nine demountable classrooms will be removed after completion of the project. This will increase the amount of open play space at the school.

A map detailing the scope of the construction works is attached.

### Progress summary

The development application (DA) has been approved by Ryde Council allowing construction activities for the Eastwood Public School upgrade to start once a contractor is appointed.

The approval considers feedback gathered throughout the DA exhibition stage and plans adapted to ensure the privacy of neighbours is adhered to.

### Next steps

A construction tender has been issued and following selection of a preferred building contractor, construction is expected to start in late 2021.

The community will be notified ahead of works starting and School Infrastructure NSW will provide regular progress updates.

### Keep up to date

We are committed to working together with our school communities and other stakeholders to deliver the best possible learning facilities for students.

You can stay up to date through school newsletters and the School Infrastructure NSW website.
