## Eastwood Public School

### Project update

September 2020

#### Investing in our schools

The NSW Government is investing \$6.7 billion over four years to deliver more than 190 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

#### Eastwood Public School

An upgrade will soon be underway at Eastwood Public School. The project will deliver nine new permanent teaching spaces in a new homebase building and a new toilet block.

#### Progress summary

A development application (DA) has been lodged with Ryde Council, to seek development consent for the new building.

Council will place the DA on public exhibition and advise nearby property owners and residents.

#### Next steps

Following detailed design, a request for tender to construct the new building will be prepared in the coming months. Construction works would not begin until the outcome of the DA is known.

You can make submissions on the DA directly to Ryde Council, once it is placed on public exhibition.

We look forward to delivering this exciting project for the Eastwood Public School community.
