

# Engadine High School

## Works notification

**10 September 2021**

Dear residents,

During site establishment works at Engadine High School, asbestos-containing material was found in the soil in the area of the new Modular Demountable Room (MDR) buildings. The material has been confirmed as bonded asbestos, which means it is attached to other material such as cement or vinyl and cannot be crumbled by light pressure.

The area is already isolated by Lloyd Group's temporary work zone fencing and safety measures and monitoring have been put in place to ensure there is no risk to students, staff or the local community.

This area will be remediated outside of school hours, during the coming weekends (11-12 and 18-19 September) in accordance with the Department of Education's Asbestos Management Plan and SafeWork NSW regulations. All work will be completed by licensed and accredited asbestos contractors, and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Testing will be completed to ensure the area has been fully remediated. The school will receive a clearance certificate before the area is open to students and staff.

A comprehensive COVID-19 Safety Plan is in place and Lloyd Group will comply with current health guidelines, including one person per 4sqm and mask and vaccination requirements.

The health, safety, and well-being of the school and the local community is our highest priority and we will continue to keep the community updated.

---
