

Project overview

The NSW Government is investing \$7 billion over the next four years to deliver more than 200 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

We are in the process of designing an upgrade to Epping West Public School to provide upgraded facilities for the school community.

Replacing 26 existing temporary classrooms with permanent learning spaces

Construction of two new school buildings to accommodate classrooms and new administration facilities to Ward Street

Refurbishment of parts of Building A to accommodate two classrooms and two Special Programs rooms

Adding an additional classroom to Building H

Innovative learning spaces

Contemporary learning and teaching prepares students for a diverse and interconnected world. We are evolving the ways we teach our students new skills valued by a changing workforce, understand different ways students learn and support new ways of interacting with information through technology.

Innovative learning environments are flexible spaces designed and equipped to support contemporary learning and teaching.

What makes an innovative learning space?

Learning space

- Different zones (areas of a building or floors) are designed to support a range of activities sometimes grouped by subject area
- Varied furniture allows for student choice, comfort and flexibility
- Spaces are flexibly connected allowing students to work in varied group sizes
- Connection between indoor and outdoor learning spaces

Organisation

- Movement is encouraged for students and teachers to collaborate and interact
- More than one teacher may be available to students within the learning environment
- Students learn in classes, small groups or individually

Teaching and learning

- Learning is personalised
- Learning is connected across different subject areas
- There is a focus on creativity and innovation with students prototyping, testing and using technology in creative ways

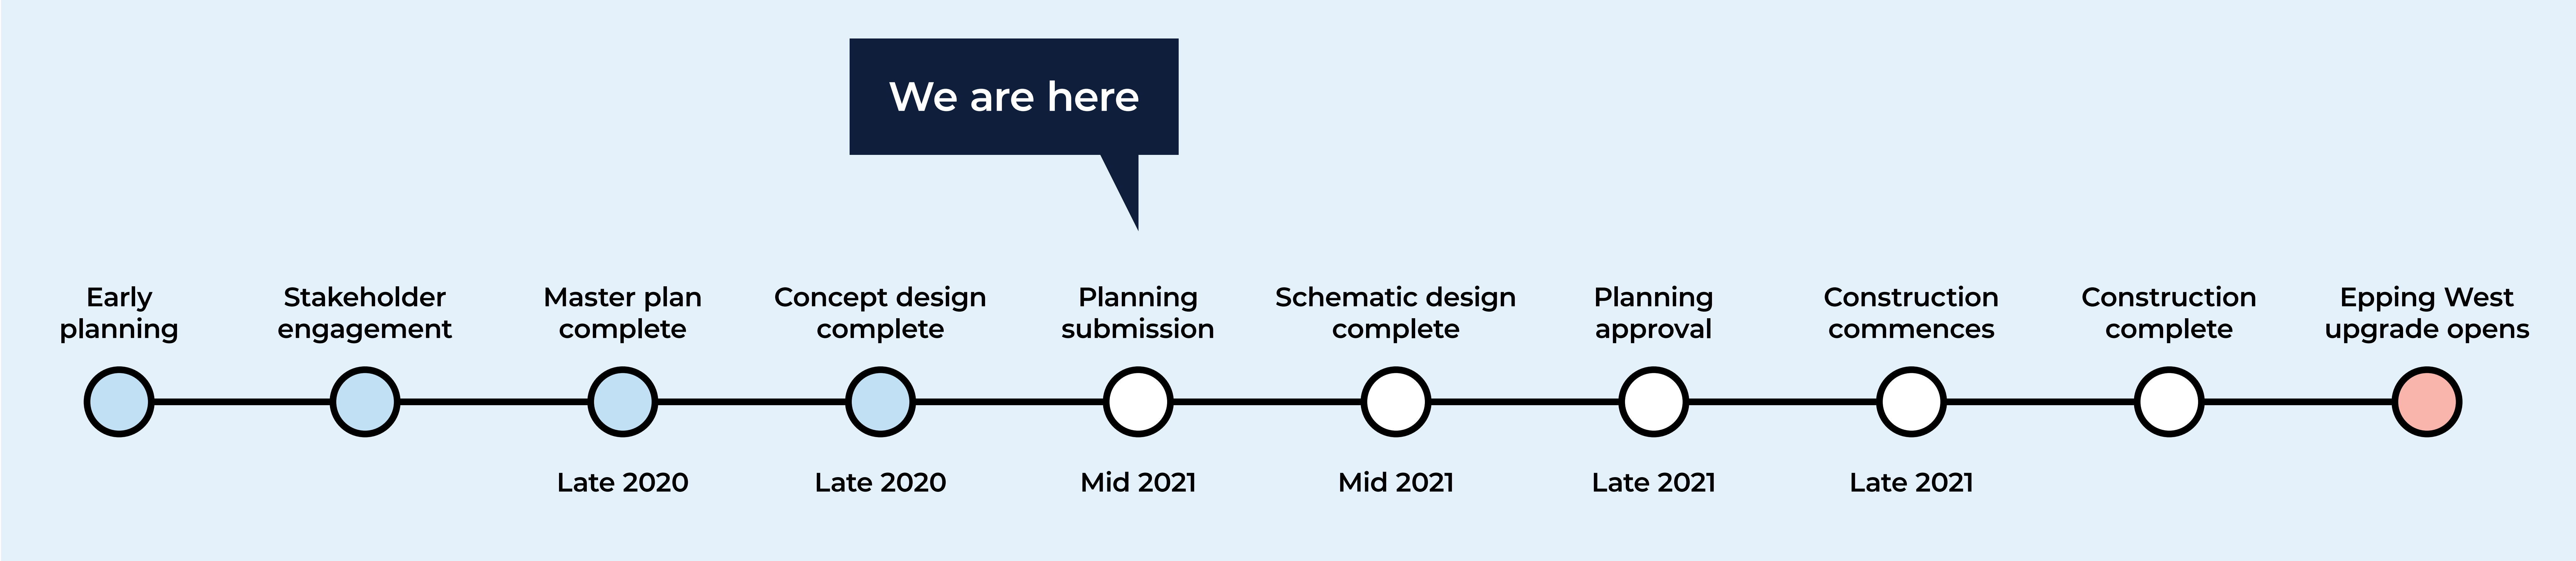

Technology

- Technology is integrated into spaces to extend learning opportunities
- WiFi is available everywhere including outdoors
- Specialist equipment is available for students to innovate, communicate and create

Project timeline

What's next?

We will continue to work with key stakeholders so that we can deliver high quality education infrastructure for the local community. The next phase of planning aims to further develop the design to confirm the final layout of the school and its facilities.

The State Significant Development Application (SSDA) has been lodged. You can make a submission on the Department of Planning, Industry and Environment's (DPIE) website at <https://www.planningportal.nsw.gov.au/major-projects/project/40061>.

We look forward to sharing more information with you as the project progresses. In the meantime you can stay informed by regularly visiting the project web page and you can contact us via email or phone if you have any questions or feedback about the new school.
