

Example of facilities we are building for students across NSW

Excelsior Public School

Project update

May 2019

Investing in our schools

The NSW Government is investing \$6 billion over the next four years to deliver more than 170 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over four years. This is the largest investment in public education infrastructure in the history of NSW.

Excelsior Public School

An upgrade is underway for Excelsior Public School to deliver new facilities and innovative learning spaces to accommodate 650 students. The project will deliver:

- 14 new innovative learning spaces
- a new three storey building
- additional administration area
- a new library and new school entrance.

Progress summary

Construction on the new three-storey building is progressing well with service relocations and early ground works now complete.

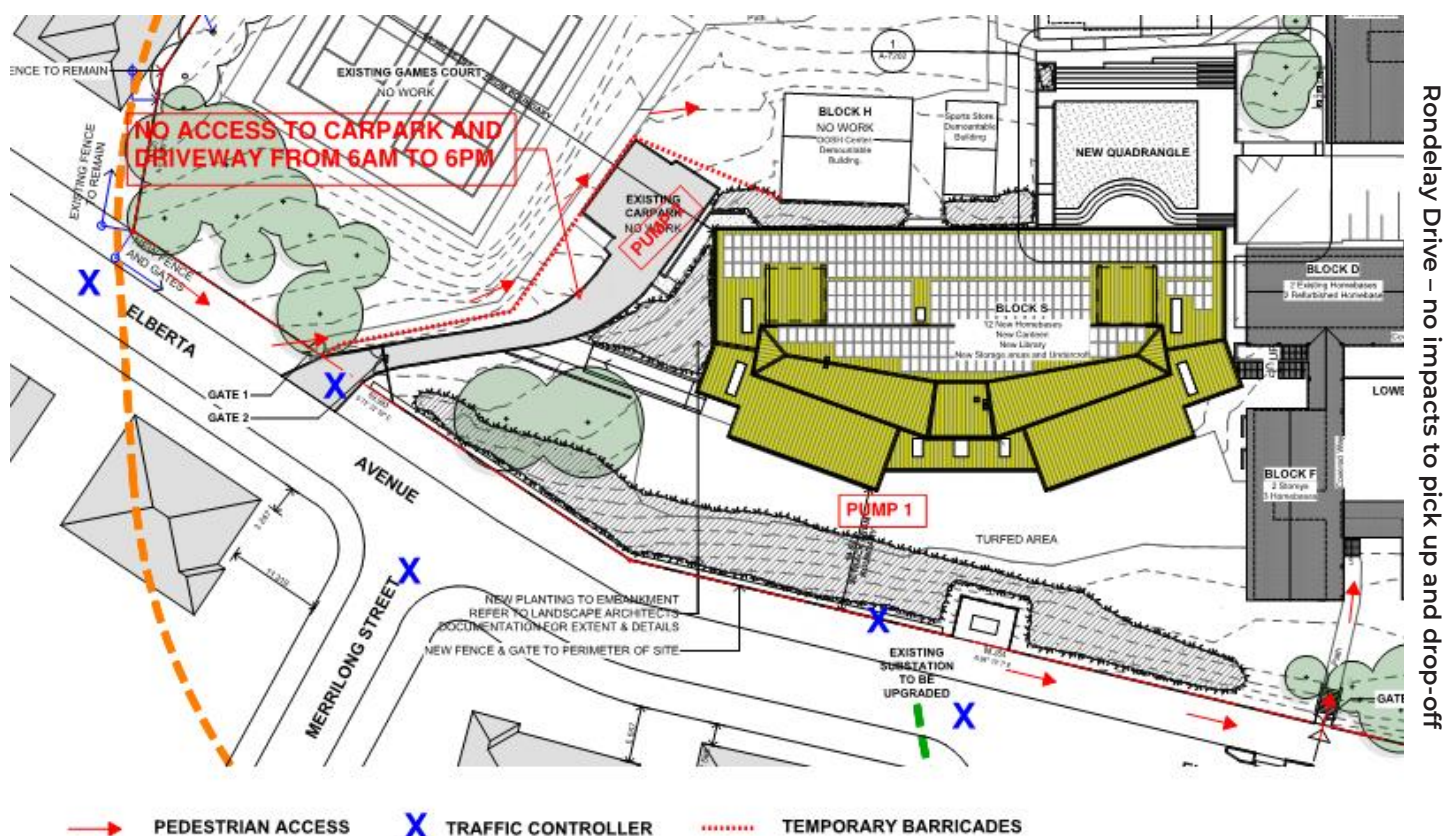

Temporary closure of Elberta Avenue carpark and driveway on Friday 3 May 6am – 6pm

To progress works on the new building, the ground floor slab will be poured this Friday 3rd May 2019. To minimise disruption to school learning and community amenity there is a need to temporarily close Elberta Avenue carpark and driveway on the school site to best manage traffic movements.

The concrete pour will see a significant increase in traffic along Elberta Avenue of large concrete trucks delivering concrete starting 6.00am to 6.00pm.

There are no impacts to the kiss and drop along Rondelay Drive.

Please see over page for detailed map.

Concrete deliveries and temporary road disruption along Elberta Avenue on Friday 3 May 6am – 6pm

Is there any disruption to school operations on Friday 3 May?

No. We have been working with the Principal and staff during the school upgrade to minimise disruption to learning at every opportunity.

What steps will be taken to control noise and dust impacts?

Hoarding and shade cloth have been installed to reduce noise and dust impacts on the school and our neighbours. Dust from truck movements will be hosed down with water as required.

How will traffic be managed?

Additional traffic managers will be located along Elberta Avenue to manage the concrete vehicles entering and exiting the site.

Are there changes to the kiss and drop off area?

No. Rondelay Drive school entrance and kiss and drop off remain unchanged.

How will you keep us informed during construction?

School infrastructure NSW will continue to share construction updates and project information as the project progresses. We will provide information through project updates, our website and school newsletters.
