## Fairvale High School

### Project update

November 2019

#### Investing in our schools

The NSW Government is investing \$6.7 billion over the next four years to deliver 190 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

#### Fairvale High School

A project is underway to upgrade Fairvale High School. The project will increase the school's capacity and includes:

- 30 permanent teaching areas including science, technology, food tech and other specialised classroom spaces
- replacing the Bini Dome structure with a multipurpose facility.

#### Progress summary

The contract for main works went out to tender in late October 2019.

#### Next steps

The tender will close in late November and we anticipate that the contract will be awarded in the summer holidays followed by site establishment. Work is expected to commence before the start of Term 1 2020.

#### Keeping you informed

School Infrastructure NSW will continue to keep the school community updated as the project progresses.
