## Fairvale High School

### Project update

May 2019

#### Investing in our schools

The NSW Government is investing \$6 billion over the next four years to deliver more than 170 new and upgraded schools to support communities across NSW. In addition, a record \$1.3 billion is being spent on school maintenance over four years. This is the largest investment in public education infrastructure in the history of NSW.

#### Fairvale High School

A project is underway to upgrade Fairvale High School. The project will increase the school's capacity and includes:

- 30 permanent teaching areas including science, technology, food tech and other specialised classroom spaces
- replacing the Bini Dome structure with a multipurpose facility.

#### Progress summary

Site remediation work has been completed and the Department of Planning and Environment pre-commencement conditions are being addressed.

#### Next steps

Over the next month we will be changing head contractors.

Site establishment will commence once a new head contractor has been appointed and construction will recommence later in 2019.

#### Keeping you informed

School Infrastructure NSW will continue to keep the school community updated as the project progresses.
