Fairvale High School

Project update

March 2019

Fairvale High School

A project is underway to upgrade Fairvale High School. The project will increase the school's capacity and includes:

- 30 permanent teaching areas including science, technology, food tech and other specialised classroom spaces
- Replacing the Bini Dome structure with a multipurpose facility.

Progress summary

The state significant development application (SSDA) has been approved by the Department of Planning and Environment. The construction contract has also been awarded to Lahey Constructions and site establishment works have been completed.

Next steps

Construction will continue throughout 2019. Works are currently being undertaken for the construction of the permanent teaching spaces.

Construction will take place between 7am-6pm on Monday to Friday and between 8am-1pm on Saturday.

Traffic control and security measures will be in place where required for the safety of students, staff, and the community.

We are here to make sure that work is completed safely and efficiently and we will minimise impacts on the community at every opportunity.
