

Fort Street Public School cycleway works

Frequently asked questions

May 2021

Why are you no longer diverting the Sydney Harbour Bridge southern cycleway down Kent Street?

A temporary separated cycleway diversion along Kent Street was School Infrastructure NSW's initial option as it provided a safe and direct alternative for bike riders during construction of the Fort Street Public School.

However, due to stakeholder and local community feedback about the proposed temporary diversion on Millers Point's local street network we will now be keeping the cycleway in its existing location, with a slight realignment. This has been developed in consultation with Transport for NSW and the City of Sydney.

Why do you need to realign the cycleway alongside the Fort Street Public School?

We need to realign this section of the cycleway to ensure it can operate safely while construction of the Fort Street Public School upgrade is underway.

When will the realignment work start?

The realignment work will start on the 4 May 2021 and will take approximately four weeks to complete.

What work is involved in the cycleway realignment work?

The realignment work will involve:

- Establishing a safe work area
- Installing a two-way section of the cycleway alongside Bradfield Highway
- Removing three small trees
- Removing one parking metre and one parking sign
- Putting up fencing (hoarding) to separate the realigned cycleway from the construction site.

Will the cycleway remain open while the realignment work is underway?

The existing cycleway will remain open while these minor works are underway. Traffic controllers and signage will be in place to ensure the safety of bike riders and pedestrians.

Temporary short duration closures may be required from time to time, but will be managed with priority given to bike riders and pedestrians.

Why don't you deliver the Sydney Harbour Bridge Cycleway upgrade before you start the school upgrade?

The Sydney Harbour Bridge Cycleway Access Program is being managed separately to this project by Transport for NSW. Please contact Transport for NSW for more information at:
