FT08 Retained brickwork and timber window facades

FT09 New elevator overrun

FT13 N New Bridge Connection to MET

Building M

Almost all of the MET's existing heritage facade is proposed to be retained in response to its historical and visual importance. All existing brickwork and timber elements shall be repaired and made good to existing where required in accordance with the Heritage Architect's instructions. A subtle, finely detailed and light weight framed pavilion-like structure on the roof marks the new elevator serving this level.

The sizing of the lift addition will be the subject of refinement during detailed design development to ensure its size and form is restrained as much as possible. A new transparent bridge with glazed infills and a metal framed structure system connects Building J and the MET and is the only point at which the MET facade is proposed to be altered. By these virtues the bridge will appear distinct from the MET.

NORTH ELEVATION (CENTRAL PLAZA)

EAST ELEVATION

ALL DIMENSIONS AND EXISTING CONDITIONS • SHALL BE CHECKED AND VERIFIED BY THE CONTRACTOR BEFORE PROCEEDING WITH THE WORK.

• ALL LEVELS RELATIVE TO 'AUSTRALIAN HEIGHT DATUM'. O DO NOT SCALE DRAWINGS.
USE FIGURED DIMENSIONS ONLY.
