

## Independent Environmental Audit

ALEX AVENUE PUBLIC SCHOOL

JULY 2020

#### 1. REVISIONS

Revision	Date	Report No.	Description	Prepared By	Approved By
1	7/09/20	J1812200828.1	Draft issued to TSA Management for review and comment	R. Johnson	R. Johnson
2	25/09/20	J1812200925.2	Final issued to TSA Management	R. Johnson	R. Johnson

Project Name	Alex Avenue Public School
Consent Number	SSD 9368
Description of Project	Staged construction and operation of a new school including four learning hubs containing home bases, a hall with canteen and an out of school hours facilities, library and administrative building, and associated works including covered outdoor learning areas, landscaping, drop -off/pick up facilities, car parking, signage and infrastructure works.
Project Address	Lot 1 and 2 DP 1244925, Farmland Drive, Schofields
Proponent	NSW Department of Education

#### **AUDIT DECLARATION**

I declare that the information provided in, and in connection with, this report is a true and correct representation of the site status as observed during the site audit on 28 July 2020. Additional information requested during the site audit was provided post-audit where available.

I declare that I have undertaken the Independent Audit and prepared the contents of the attached Independent Audit Report and to the best of my knowledge:

- the audit has been undertaken in accordance with relevant condition(s) of consent, the Independent Audit Post Approval Requirements (IAPAR, DP&E 2018), and AS/NZS ISO 19011.2014
   Guidelines for Auditing Management Systems
- the findings of the audit are reported truthfully, accurately and completely
- I have exercised due diligence and professional judgement in conducting the audit;
- I have acted professionally, objectively and in an unbiased manner
- I am not related to any proponent, owner or operator of the project neither as an employer, business partner, employee, or by sharing a common employer, having a contractual arrangement outside the audit, or by relationship as spouse, partner, sibling, parent, or child
- I do not have any pecuniary interest in the audited project, including where there is a reasonable likelihood or expectation of financial gain or loss to me or spouse, partner, sibling, parent, or child
- neither I nor my employer have provided consultancy services for the audited project that were subject to this audit prior to the audit
- I have not accepted, nor intend to accept any inducement, commission, gift or any other benefit (apart from payment for auditing services) from any proponent, owner or operator of the project, their employees or any interested party. I have not knowingly allowed, nor intend to allow my colleagues to do so.

Lead Auditor: Richard Johnson

Title: Director, Aspect Environmental Pty Limited

Signature: Date: 25/09/20

Limitation: This document has been prepared by Aspect Environmental Pty Limited for TSA Management Pty Ltd (acting on behalf of Department of Education NSW). The document and contents are subject to, and issued in accordance with, the provisions of the contract between Aspect Environmental Pty Limited and TSA Management Pty Ltd. Aspect Environmental Pty Limited accepts no liability or responsibility whatsoever for, or in respect of, any use of, or reliance upon, this document by any third party.

#### **EXECUTIVE SUMMARY**

The Conditions of Consent (CoC) issued for State Significant Development SSD 9368 (21 May 2020) require, under condition C33, independent audits of the development to be carried out. This independent environmental audit report satisfies that requirement.

The audit has been conducted in accordance with:

- the Independent Audit Program;
- the requirements of an Independent Audit Methodology and Independent Audit report in the Independent Audit Post Approval Requirements (Department of Planning and Environment, June 2018); and
- the processes and practice procedures identified in AS/NZS ISO 19011:2014 -Guidelines for Auditing Management Systems.

The audit report documents the outcomes of the review of compliance undertaken by Aspect Environmental Pty Limited (Aspect). The audit process comprised pre-site audit documentation review, stakeholder scoping review, opening meeting, site audit, closing meeting and post-site audit documentation review and follow up.

The audit was conducted in July 2020 with a site inspection and interviews undertaken on the 28 July 2020. Findings of the audit are presented against the required scope within the body of this report, the attached audit findings table (Appendix A) and in the photo log provided (Appendix B).

Consultation was undertaken with the Department of Planning, Infrastructure and Environment (DPIE) and Blacktown City Council. The DPIE stated:

- on 15 May 2020, the Department issued Richard Crookes Construction an Official Caution for carrying out development without a development consent first being obtained; and
- no complaints have been received by the Department directly from the public.

No adjustment was made to the audit scope.

Blacktown City Council advised that following a review of their corporate database, that no complaints have been received in respect to Lot 1 Farmland Drive, Schofields.

No adjustment was made to the audit scope.

It was found that the site was generally compliant, and the project was being managed in accordance with the requirements of the SSD 9368 consent. Of the 116 CoC relevant to the current audit, the following findings of compliance were made:

- 62 compliant;
- 1 non-compliant; and
- 53 not triggered.

The 1 non-compliance is summarised as:

 A25 - a(i) requires the documents referred to in condition A2 be made publicly available on the Project's website at least 48 hours before the commencement of construction. The EIS, Response to Submissions and Supplementary Response to Submissions were not available on the Project's website.

Environmental performance of the development was considered to be satisfactory with no significant discernible offsite impacts at the time of the audit and appropriate management controls implemented on site to reduce potential for environmental impacts.

This audit constitutes the first independent environmental construction audit completed for the development, as such, there are no previous audit findings to report on.

The reviewed CEMP and sub-plans were considered to generally be adequate for the nature of the site. Improvement opportunities and observations were identified pertaining to:

- spill kits were not in place at the refuelling area and hazardous goods and storage/ laydown area; and
- sediment fence along the western perimeter boundary of the site (interface with adjacent development) is not keyed in correctly and in places requires repair/ replacement.

The audit protocol and findings are summarised in Section 3 of the report and provided in detail in Appendix A.

The audit concludes that the Alex Avenue Public School is being constructed generally in compliance with the requirements of the SSD.

Glossary		
Audit	Systematic, independent and documented process for obtaining audit evidence	
	and evaluating it objectively to determine the extent to which the audit criteria	
	are fulfilled.	
Audit criteria	Set of policies, procedures or requirements.	
Audit evidence	Records, statements of fact or other information, which are relevant to the audit	
	criteria and verifiable. Audit evidence may be qualitative or quantitative.	
Audit findings	Results of the evaluation of the collected audit evidence against the audit	
	criteria.	
Audit conclusion	Outcome of an audit provided by the audit team after consideration of the audit	
	objectives and all audit findings.	
Audit client	Organisation or person requesting an audit.	
Auditee	Organisation being audited.	
Auditor	Person with competence to conduct an audit.	
Audit team	One or more auditors conducting an audit, supported if needed by technical	
	experts. One auditor of the audit team is appointed as the audit team leader.	
	The audit team may include auditors in training.	
Audit plan	Description of the activities and arrangements for an audit.	
Audit scope	Extent and boundaries of an audit.	
Compliant	The auditor has collected sufficient verifiable evidence to demonstrate that all	
	elements of the requirement have been complied with within the scope of the	
	audit.	
Improvement	A finding resulting from either site inspection or document review which enables	
opportunity	the auditee to consider the adoption of an action or strategy that will enhance	
	environmental performance against the audit criteria.	
Non-Compliant	The auditor has determined that one or more specific elements of the conditions	
	or requirements have not been complied with within the scope of the audit.	
Not Triggered	A requirement has an activation or timing trigger that has not been met at the time when	
	the audit is undertaken, therefore an assessment of compliance is not relevant.	
Observation	A comment on an environmental aspect, value or management control, process	
	or record that is not a specific requirement of the audit criteria.	

#### 1. Introduction

#### 1.1. Project Background

Alex Avenue Public School (the school) is located at the corner of Farmland Drive, Schofields. The Project involves the construction of a new school catering for students from Kindergarten to Year 6. The School will accommodate approximately 1,000 students and 70 full-time staff to assist with alleviating pressure on existing school enrolments in the area and cater for future population growth.

The Project will comprise the following works:

- construction of a 2-storey library, administration and staff building (Block A);
- construction of four 2-storey classroom buildings (Block B) containing 40 homebases (stage 1 approximately 19 homebases);
- construction of a single storey assembly hall (Block C) with a performance stage and integrated covered outdoor learning area (COLA). The assembly hall will have OOSH facilities, storeroom areas and amenities;
- associated site landscaping and open space including associated fences throughout and games courts;
- pedestrian access points along both Farmland Drive and the future Pelican Road;
- substation on the north-east corner of the site; and
- school signage to the front entrance.

#### 1.2. Project Location

The School is located approximately 2.5km west of the Fairfield city centre, within the Blacktown City LGA (Figure 1-1). The site covers Lot 1 and 2 being part of existing Lot 4 DP1208329 & Lot 121 DP1203646 and has a total area of approximately 2 hectares. The surrounding area is diversely characterised including medium residential zones currently under construction to the site north, public recreation and low density residential to the east, currently underdeveloped medium density residential to the south west undeveloped medium density residential to the south west.

Figure 1-1 Site Location (Urbis EIS, February 2019)

#### 1.3. State Significant Development

The Alex Avenue Public School project is a State significant development (SSD 9368) that was assessed under Part 4 of the *Environmental Planning and Assessment Act* 1979 (EP&A Act) by the NSW Department of Planning, Industry and Environment (DPIE). Conditions of Consent (CoC) were issued by the DPIE on 21 May 2020. These CoC have been used to inform the scope of this independent audit.

The conditions of the SSD 9368 are structured under the following category headings:

- Part A Administrative Conditions (A1-A33);
- Part B Prior to Commencement of Construction (B1-B30);
- Part C During Construction (C1-C36);
- Part D Prior to Commencement of Operation (D1-D46); and
- Part E Post Occupation (E1-E16).

The SSD instrument also provides definitions for key terms used within the conditions and two Appendices.

#### 1.4. Audit Introduction

The Independent Audit Program (IAP) was prepared by Aspect Environmental Pty Limited (Aspect) on 25 May 2020. The IAP was prepared in accordance with the Independent Audit Post Approval Requirements (IAPAR) (DP&E, 2018). This Independent Environmental Audit has been prepared in accordance with the IAP, inclusive of the documented Independent Audit Methodology within the IAP, and the IAPAR.

#### 1.5. Audit Objectives

The objectives of the Independent Environmental Audit are to identify the compliance, or otherwise, of the current (construction) phase of development of the Alex Avenue Public School Project with the issued CoC for SSD 9368 and to provide an objective evaluation of environmental performance of the development.

#### 1.6. Independent Auditor

This initial independent environmental audit was conducted by Richard Johnson of Aspect as the lead auditor. Richard has tertiary qualifications in science (BSc) and law (Diploma in Law) and has 28 years of experience in environmental assessment and management. Richard completed certification for environmental auditing from Det Norske Veritas in 1997.

A statement of independence is provided at the beginning of this document to identify no actual or perceived conflict exists in the performance of the independent environmental audit.

#### 1.7. Audit Criteria

The audit criteria for this audit are identified by the CoC for SSD 9368 and by the expectations of the IAPAR (DPIE, 2018).

The audit findings (Appendix A) identify the relevant criteria and the performance in terms of audit evidence collected or observed against the criteria to verify compliance during the course of conducting the audit.

#### 1.8. Audit Scope

The scope of auditing requirements has been based on consideration of:

- the project SSD EIS (Urbis, February 2019) and associated Response to Submission documentation (Urbis, June 2019);
- the compliance requirements typical of such developments, in this instance referenced to the CoC procedural and documentation requirements:
  - to support the administrative conditions (Part A);
  - prior to commencement of construction (Part B);
  - during construction (Part C); and
- the independent auditing requirements and expectations specified in the IAPAR (2018).

#### The audit scope consisted of:

- an assessment of compliance with CoC and other relevant approvals and licences;
- an assessment of environmental performance of the development including:
  - an assessment of actual impacts compared to predicted impacts documented in the EIS;
  - an assessment of incidents, non-compliances and complaints that have occurred on the project;

- an assessment of feedback received from DPIE and Blacktown City Council;
- an assessment of the performance of the development having regard to agency policy and any particular environmental issues identified through consultation carried out when developing the scope of the audit;
- a high-level review of the Project's environmental management system (EMS);
- a high-level assessment of the adequacy of the Project's environmental management plans and sub-plans; and
- any other matters considered relevant e.g. as identified through consultation with relevant agencies and review of complaints registers (management plan implementation and site contamination).

This scope is consistent with that identified within the IAP (Aspect, May 2020) and the IAPAR.

#### 1.9. Audit Period

The audit is confined in time to the status of the site documentation, reviewed between 15 July 2020 and 28 August 2020 and site operations at the time of the site inspection undertaken on 28 July 2020.

#### 2. AUDIT METHODOLOGY

#### 2.1. Selection and Endorsement of Auditor

#### **Lead Auditor: Richard Johnson**

Richard holds tertiary qualifications in science (BSc) and law (Diploma in Law) and has 30 years of experience in environmental assessment and management. Richard completed certification for environmental auditing from Det Norske Veritas in 1997.

The DPIE agreement to the nominated lead auditor was received on 09 June 2020.

#### 2.2. Independent Audit Scope Development

The DPIE sets out the minimum requirements to be met when undertaking independent audits in accordance with CoC and the Independent Audit Post Approval Requirements (DP&E 2018). These requirements apply to all SSD where an independent audit is required by the CoC.

An independent audit program prepared by Aspect (May 2020) outlined the scope of auditing requirements for the project. This audit scope was discussed during the opening meeting on 28 July 2020.

Requirement for further development of the scope of the audit was considered through agency consultation (DPIE and Blacktown City Council) and review of complaints registers and additional licence, permit or approval requirements.

#### **Review of Complaints Register**

A review of documentation identified various means of registering a complaint for the development. Complaints may be recorded via the project's website <a href="mailto:schoolinfrastructure@det.nsw.edu.au">schoolinfrastructure@det.nsw.edu.au</a> or alternatively to the dedicated project 1300 Community Hotline number or to Project/Site Management team directly. Each of which would be directed back to the single point source for collation and any subsequent action.

No complaints have been recorded to 13 July 2020.

#### 2.3. Compliance Evaluation

The audit findings are based on verifiable evidence either sighted, reviewed, collated or observed. The following methods were used to obtain verifiable evidence relevant to the audit scope:

- review of project records, documentation and reports including physical and digital versions either provided directly by project representatives or available as published, publicly available information online;
- interviews with construction project personnel;
- correspondence with third-party stakeholders; and
- site inspections, including collection of photographic evidence.

A review of verifiable evidence was undertaken against the identified audit criteria to determine the level of compliance.

#### 2.4. Site Interviews

Site interviews were conducted on 28 July 2020. Site interviews were conducted with the project management team within the site office and during the course of the site inspection.

#### 2.5. Site Inspection

An inspection of the entire project site was carried out on 28 July 2020. The site inspection was accompanied by the Icon Construction site management team.

The site inspection comprised a walkover of the defined construction footprint (including external boundary where accessible) and included internal and external work environments.

#### 2.6. Consultation

Consultation was undertaken with the DPIE on 24 and 28 July 2020.

Consultation with Blacktown City Council was also undertaken between 24 July and 04 August 2020.

#### 2.7. Compliance Status Descriptors

Compliance findings resulting from the assessment of audit evidence have been divided into three categories as follows:

- **Compliant**: The auditor has collected sufficient verifiable evidence to demonstrate that all elements of the requirement have been complied with within the scope of the audit.
- Non-compliant: The auditor has determined that one or more specific elements of the conditions or requirements have not been complied with within the scope of the audit.
- Not triggered: A requirement has an activation or timing trigger that has not been met at the time when the audit is undertaken, therefore an assessment of compliance is not relevant.

Some of the recorded audit findings identify improvement opportunities in relation to audit criteria that have been identified as compliant, for consideration by the proponent.

#### 2.8. Opening Meeting – Site Audit

The audit commenced with an opening meeting. During the opening meeting the objectives of the audit, the scope of the audit, the resources required and methodology to be applied were discussed. Attendees at the meeting were:

- Richard Johnson (Director, Aspect Environmental);
- Mathew Williams (Associate Director, Aspect Environmental);
- Isaac Pinkerton (Site Engineer, Richard Crookes Construction);
- Chris Evans (Site Manager, Richard Crookes Construction);
- Jaron Hoffenberg (Project Manager, TSA Management); and

Darren Vozzo (Project Manager, Richard Crookes Construction).

#### 2.9. Closing Meeting – Site Audit

The site audit closing meeting was held on the afternoon of 28 July 2020. The site audit closing meeting was attended by:

- Richard Johnson (Director, Aspect Environmental);
- Mathew Williams (Associate Director, Aspect Environmental);
- Isaac Pinkerton (Site Engineer, Richard Crookes Construction);
- Jaron Hoffenberg (Project Manager, TSA Management);
- Will Panaueras (HSE, Richard Crookes Construction); and
- Darren Vozzo Project Manager, Richard Crookes Construction.

It was identified that during the post-site audit phase further review of records and documentation would be undertaken prior to the issue of the draft audit findings. This process would provide TSA Management and Richard Crookes Construction with the ability to provide further evidence for verification (if required/available) against the audit criteria that may not have been identified or accessible at the time of the site audit. Provision of any such evidence would enable the compliance assessment to be reviewed prior to issue of the final audit findings, although it was identified that the review of supplementary evidence would not automatically change an audit finding.

#### 2.10. Review and Response to Draft Independent Environmental Audit Report

The draft audit report was provided to TSA Management and Richard Crookes Construction for review on 28 August 2020 to allow an opportunity to provide any additional information before finalising the audit report.

A draft report finding would generally only be revised in instances where the auditor is satisfied that the additional information or evidence provided is sufficient to determine that an error of fact or misunderstanding has taken place, and this is adequately supported by the provision of additional objective audit evidence that was not available at the time of site audit. Any additional information provided by a proponent in this regard must be noted in the report and the auditor's view in relation to it recorded.

Additional information provided after the Applicant's review of the Draft Independent Audit Report is shown in Table 2-1.

Table 2-1 Additional information provided after the Applicant's review of the Draft Independent Audit Report

ID	Requirement	Independent Audit Findings	Department of Education Actions	Additional Information
A25	A25 a(i) requires the documents referred to in condition A2 be made publicly available on the Project's website at least 48 hours before the	At the time of the audit, the EIS, Response to Submissions and Supplementary Response to Submissions were	Publish the documents required by condition A25 on the Projects website.	As of 25/09/20, the required documents were available on the Project website https://www.schoolinfrastructure nsw.gov.au/ projects/g/galungara-public-school.html#category-reports.

ID	Requirement	Independent Audit Findings	Department of Education Actions	Additional Information
	commencement of construction.	not available on the project's website.		The NCR is closed.

No changes were made to the audit findings following the Applicant's review of the Draft Audit Report.

Under SSD 9368 CoC C34, the Applicant is required to prepare a response to the final Independent Audit Report and submit its response to the Department and Certifier and to make the Independent Audit Report and the Applicant's response publicly available within 60 days of submission.

#### 3. AUDIT FINDINGS

This section of the audit identifies the reported audit findings based on a review of available audit evidence during the audit period, evaluated against the defined audit criteria.

#### 3.1. Project Boundary and Setting

The project boundary is identified by the boundaries of SSD 9368 as shown in Figure 3-1 below. The audit is confined in time to the status of site operations at the time of the site inspection component of the audit, being 28 July 2020. The audit provides a representative snapshot of performance at the time of the site audit.

Documentation relevant to the audit scope was made available pre-site audit for information and review. Follow-up documentation was provided post-site audit to address questions or items raised at the time of the site audit, during the closing meeting or identified in the draft audit findings.

Figure 3-1 Aerial photograph of site showing boundary of SSD 9368 (Source: EIS Urbis, February 2019)

#### 3.2. Approval and Document List

Documents referenced as part of this audit are provided in the tables below. A list of relevant approval documents is provided in Table 3-1. Site specific registers, procedures and checklists sighted as part of this audit are provided in Table 3-2.

Table 3-1 Approval and document list

Approval Reference	Document Details
Environmental Impact Statement	Alex Avenue Public School; EIS was produced by Urbis and dated February 2019.
State significant development	SSD 9368 dated 21 May 2020.
B5 Unexpected Contamination Procedure	An unexpected finds protocol for contamination was prepared by Greencap as part of the CEMP and is dated 26 July 2019.
B8 Community Communication Strategy	A Community Communication Strategy has been prepared by Schools Infrastructure NSW and is dated May of 2020.
B13 Construction Environmental Management Plan	Richard Crookes Construction has produced the CEMP. The CEMP Revision 2 is dated 3 June 2020.
B15 The Construction Traffic and Pedestrian Management Sub-Plan (CTPMSP)	Jim's Traffic Control produced the CTPMSP. Version 2.3 of the plan is dated 29 May 2020.
B16 The Construction Noise and Vibration Management Sub-Plan (CNVMSP)	The CNVMSP was produced by Acoustic Logic. Revision 2 of the plan is dated 3 June 2020.
B17 The Construction Waste Management Sub-Plan (CWMSP)	The CWMSP was prepared by EcCell Environmental. Version 5 is dated 21 November 2019.
B18 Construction Soil and Water Management Plan (CSWMP)	The CSWMP was prepared by Northrop. Revision 3 is dated 16 May 2020.

Table 3-2 Construction site document list

Document Details	Document Details & Observations			
Environmental Inspection	Completed 27/07/20. Evidence of tree protection in place, sediment fence installation and geofab covering/ protecting stormwater drains.			
Site Induction Records	Sighted Site Induction Presentation. Included an update to reflect COVID-19 response and site requirements.			
Incident Register	Reviewed Incident Register – 1 injury noted 13/08/20 and vandalism of plant reported to Police on 26/10/19.			
Plant and Equipment Induction Record	Reviewed completed plant induction for 10T excavator dated 11/06/2020.			

#### 3.3. Compliance Performance

Compliance performance is assessed against the nominated audit criteria as applied to the audit scope and are included in detail in Appendix A. Findings are based on an evaluation of the documentation and field-based observations, presented in support of compliance against the audit requirements. A photo log to support the findings was compiled during the site audit and is presented in Appendix B to this report.

A summary of SSD compliance findings is presented in Table 3-3.

Table 3-3 Summary of SSD compliance findings

SSD Category	# Requirements	# Compliant	# Non- Compliant	# Not Triggered
Part A - Administrative	33	8	1	24
Part B - Prior to Commencement of Construction	30	23	0	7
Part C - During Construction	36	24	0	12
Appendix 1 Advisory Notes	13	7	0	6
Appendix 2 Written Incident Notification and Reporting Requirements	4	0	0	4
Total	116	62	1	53

The detailed evidence and findings of the audit are provided in Appendix A.

#### 3.4. Summary of Agency Notices, Orders, Penalty Notices or Prosecutions

The project has been issued with 1 agency notice. On 15 May 2020, the Department issued Richard Crookes Construction an Official Caution for carrying out development without a development consent first being obtained.

#### 3.5. Audit Non-Compliances

Of the 116 CoC relevant to the current audit, a total of 1 non-compliance was identified as summarised in Table 3-4.

Table 3-4 Summary of audit non-compliances

Approval (ID)	Audit findings
A25	A25 a(i) requires the documents referred to in condition A2 be made publicly
	available on the Project's website at least 48 hours before the commencement
	of construction. The EIS, Response to Submissions and Supplementary
	Response to Submissions were not available on the Project's website.

#### 3.6. EMP, Sub-plans and Post Approval Documents

A list of the post-approval EMP and Sub-plans has been provided in Table 3-1. Additional documentation reviewed as part of the site audit is provided in Table 3-2.

#### Implementation of management plans

Site controls and management requirements were clearly identified on site at the site entrance point from the construction site sheds.

In reviewing the implementation of the various management plans on site, a total of 2 improvement opportunities are recommended:

 spill kits were not in place at the refuelling area and hazardous goods and storage/ laydown area; and

 sediment fence along the western perimeter boundary of the site (interface with adjacent development) is not keyed in correctly and in places requires repair/ replacement.

Each of the items noted above were identified during the closeout meeting with the site team as representing an opportunity to enhance environmental site performance that would demonstrate a clear and proactive implementation of the site management plans that is consistent with site notices for implementation.

#### 3.7. Environmental Management System

A high-level review of the EMS adequacy was undertaken as part of the project audit. The EMS components reviewed as part of the audit scope are provided in Table 3-5.

Table 3-5 EMS component audit scope

EMS Component	Requirement
Legal Requirements Register	Identification of applicable legislative requirements, applicable standards, codes of practice and industry guidelines with demonstration of relevance to the project scope.
Aspects/Impacts Register	Identification of the Projects environmental aspects and impacts with identification of those aspects/Impacts of high significance to the project.
Roles and Responsibilities	Identification and allocation of roles and responsibilities to relevant site and management personnel to provide effective site environmental management and performance.
Training	Identification of awareness and vocational training requirements relevant to the nature of works to be performed and associated environmental values or requirements identified within the Aspects/Impacts and Legal Requirements register.
Monitoring and Review	Program and process for monitoring and review of the Project EMS to demonstrate applicability.
Communications	Identification of how the EMS is implemented during the course of the project, including the communication of change and access to information.

The expected elements of an EMS were identified as being implemented through activities onsite, induction and training programs, toolbox talks, risk notice boards, environmental management notices and in the progressive review and implementation of management plans.

#### 3.8. Environmental Performance

The environmental performance of the project was assessed during the site visit against the environmental aspects listed in Table 3-6.

Table 3-6 Environmental aspect audit scope

Tuble 3-0 Elivile	minental aspect addit scope
Environmental	Requirement
Aspect	
Air	Dust and other emissions are being managed on site and generally confined to site. No record of incidents/complaints.
Noise	Work hours are within approved hours. Noise mitigation evident. No record of incidents/complaints.
Land (ErSed)	Sediment and erosion controls are performing to control surface erosion and discharges from site within acceptable limits. No record of incidents/complaints. Reinstatement requirements to be prioritised.
Water	Site surface water is managed to prevent scouring of banks of receiving waters. Clean water is separated from dirty water (i.e. construction works contact water). Spill Notifications. No record of incidents/complaints.
Waste	Containment and appropriate sorting of waste as appropriate. Removal of surplus waste items would improve general housekeeping. No record of incidents/complaints.
Traffic	Traffic management, access and flow is maintained. No tracking of soil/muds onto public roads. Record of incidents/complaints identifies one complaint re: on-street parking and this was resolved and closed out.
Flora/Fauna	Pre-clearing checks undertaken. Demarcation of no-go zones. Record of incidents/complaints.

Environmental performance in respect of the relevant environmental aspects, was found to be satisfactory with sound site environmental management generally exhibited onsite.

#### 3.9. Consultation Outcomes

Stakeholders were contacted and feedback sought with regards to project performance. A summary of the feedback received is provided in Table 3-7.

Table 3-7 Agency consultation outcomes

Tubic 5 7	Agency consultation	a comes
Agency	Contact	Comment
Blacktown	Manager	<ul> <li>Advised that following a review of their corporate</li> </ul>
City Council	Development	database, that no complaints have been received in
	Assessment	respect to Lot 1 Farmland Drive, Schofields.
DPIE	Senior Compliance Officer	<ul> <li>On 15 May 2020, the Department issued Richard Crookes Construction an Official Caution for carrying out development without a development consent first being obtained; and</li> <li>No complaints have been received by the Department directly from the public.</li> </ul>

#### 3.10. Complaints

Complaints may be recorded via the project's website schoolinfrastructure@det.nsw.edu.au or alternatively to the dedicated project 1300 Community Hotline number or to the Project/Site Management Team directly.

The NSW Department of Education – School Infrastructure Complaints Register for the project was viewed online on the 13 July 2020 (last updated 26 May 2020). At this time the register had no complaints registered.

#### 3.11. Site Inspection

A site inspection as part of the audit was undertaken on 28 July 2020. During the site inspection, observations on the project's environmental performance were made and captured by site photos (Appendix B).

Environmental performance was determined to be satisfactory.

#### 3.12. Site Interviews

Site interviews were generally structured around the prescribed SSD CoC, management plan expectations and EMS processes.

The site team was questioned on how the project might demonstrate compliance, response to, and an address of particular site conditions. Follow up questions on documentation of processes and site procedures pertaining to environmental management onsite were used to assess understanding of environmental risk and performance management expectations onsite, inclusive of communications and change management.

The site interviews demonstrated that the project personnel had a good understanding of environmental risks and controls associated with the project and immediate neighbours.

#### 3.13. Compliance Report Recommendations

There has been one compliance report for the project as triggered by the CRPAR (2018) Pre-Construction Compliance Report. CoC B29 requires the report to be made publicly available 60 days after submitting it to the Planning Secretary and notify the Planning Secretary and the Certifier in writing at least seven days before this is done. Aspect sighted confirmation of submission to Planning Secretary and Certifier on 01 June 3020. The report was not reviewed as part of this audit.

#### 4. RECOMMENDATIONS

#### 4.1. Non-Compliance Recommendations

A total of 1 non-compliance was identified. The non-compliance is categorised under confirmation of public notification.

The identified non-compliance is not considered to represent an immediate significant risk of material harm to the environment.

#### 4.2. Improvement Opportunity Recommendations

A total of 2 improvement opportunities have been recommended:

- spill kits were not in place at the refuelling area and hazardous goods and storage/ laydown area; and
- sediment fence along the western perimeter boundary of the site (interface with adjacent development) is not keyed in correctly and in places requires repair/ replacement.

Each of the above items are considered to be readily addressed, however, unchecked they have the potential to lead to more significant issues.

#### 5. CONCLUSION

This Independent Audit Report satisfies the requirements of SSD 9368 CoC C33.

The audit has been conducted in accordance with the DPIE Independent Audit Post Approval Requirements (June 2018) and the AS/NZS ISO 19011:2014 – Guidelines for Auditing Management Systems. The audit report documents the outcomes of the review of compliance undertaken by Aspect. The audit process comprised pre-site audit documentation review, site audit, and post-site audit documentation review and follow up. The site audit was conducted on 28 July 2020.

It was found that the project was generally compliant with the CoC and construction activities are generally being managed in accordance with the requirements of the SSD instrument.

One non-compliance was identified:

 A25 - a(i) requires the documents referred to in condition A2 be made publicly available on the Project's website at least 48 hours before the commencement of construction. The EIS, Response to Submissions and Supplementary Response to Submissions were not available on the Project's website.

Improvement opportunities and observations were also identified and recorded, associated with provision of spill kits in high risk areas and ERSED controls that can be readily managed within the existing suite of management plans and site processes and their progressive review and implementation.

The audit concludes that the Alex Avenue Public School is generally being constructed in compliance with the requirements of the SSD instrument.

	Terms of Consent					
A2	The development may only be carried out:	Items (a) to (c) verified through site observation during site audit	Compliance with condition has been demonstrated.			
	(a) in compliance with the conditions of this consent;	inspection and document review.				
	(b) in accordance with all written directions of the Planning Secretary;					
	(c) generally in accordance with the EIS, Response to Submissions and Supplementary Response to Submissions 2;	Item (d) not able to be verified at this early stage of the development.				
	(d) in accordance with the approved plans in the table below:*					
	,					

A3	Consistent with the requirements in this consent, the Planning Secretary may make written directions to the Applicant in relation to:  (a) the content of any strategy, study, system, plan, program, review, audit, notification, report or correspondence submitted under or otherwise made in relation to this consent, including those that are required to be, and have been, approved by the Planning Secretary;  (b) any reports, reviews or audits commissioned by the Planning Secretary regarding compliance with this approval; and (c) the implementation of any actions or measures contained in any such document referred to in (a) above.	NA	Not triggered		
A4	The conditions of this consent and directions of the Planning Secretary prevail to the extent of any inconsistency, ambiguity or conflict between them and a document listed in condition $\Delta 2(c)$ . In the event of an inconsistency, ambiguity or conflict between any of the documents listed in condition $\Delta 2(c)$ , the most recent document prevails to the extent of the inconsistency, ambiguity or conflict.	No project changes documented triggering an accordance or consistency assessment.	Not triggered		
	Limits of Consent				
A5	This consent lapses five years after the date of consent unless work is physically commenced.	NA	Not triggered		
	Prescribed Conditions				
A6	The Applicant must comply with all relevant prescribed conditions of development consent under Part 6, Division 8A of the EP&A Regulation.	Achievement demonstrated by findings of this audit.	Compliant		
	Planning Secretary as Moderator				
А7	In the event of a dispute between the Applicant and a public authority, in relation to an applicable requirement in this approad or relevant matter relating to the Development, either party may refer the matter to the Planning Secretary for resolution. The Planning Secretary's resolution of the matter must be binding on the parties.	No disputes were communicated during the audit.	Not triggered		
	Evidence of Consultation				
A8	Where conditions of this consent require consultation with an identified party, the Applicant must:  (a) consult with the relevant party prior to submitting the subject document for information or approval; and (b) provide details of the consultation undertaken including: (l) the outcome of that consultation, matters resolved and unresolved; and (ii) details of any disagreement remaining between the party consulted and the Applicant and how the Applicant has addressed the matters not resolved.	Consultation with identified parties for a number of individual CoCs was sighted in correspondence during the Audit. E.g. B7 Consultation Summaries for Endeavour Energy, Jemena, NBN and Sydney water.  Refer B18 & B19.	Compliant

	External Walls and Cladding				
A19	The external walls of all buildings including additions to existing buildings must comply with the relevant requirements of the BCA.	Sighted statement of compliance that external wall components comply with the BCA from Modscape Commercial Pty Ltd dated 16/07/19.	Condition is compliant.		
	Design and Construction for Bush Fire	10/07/15.			
A20	Construction of proposed Buildings A, B1 and B2 must comply with Sections 3 and 5 (BAL 12.5) Australian Standard AS3959-2009 Construction of buildings in bushfire-prone areas or NASH Standard (1.7.14 updated) National Standard Steel Framed Construction in Bushfire Areas – 2014 as appropriate and section A3.7 Addendum Appendix 3 of Planning for Bush Fire Protection 2006.	Compliance with this condition not triggered at this stage of the development - refer Crown Certificate: "The Building and associated works are to be installed and certification on completion from the bushfire consultant is required to confirm compliance with BCA Part GS.2 and AS 3959 for the relevant BAL rating for the site as determined by the Bushfire consultant".	Not triggered		
A21	Water, electricity and gas are to comply with sections 4.1.3 and 4.2.7 of Planning for Bush Fire Protection 2006.	Compliance with this condition not triggered at this stage of the development.	Nottriggered		
	Applicability of Guidelines				
A22	References in the conditions of this consent to any guideline, protocol, Australian Standard or policy are to such guidelines, protocols, Standards or policies in the form they are in as at the date of this consent.	Procedural condition.	Noted.		
A23	Consistent with the conditions of this consent and without altering any limits or criteria in this consent, the Planning Secretary may, when issuing directions under this consent in respect of ongoing monitoring and management obligations, require compliance with an updated or revised version of such a guideline, protocol, Standard or policy, or a replacement of them.	No directions issued by Planning Secretary.	Not triggered		
	Monitoring and Environmental Audits				
A24	Any condition of this consent that requires the carrying out of monitoring or an environmental audit, whether directly or by way of pajen, strategy or program, is taken to be a condition requiring monitoring or an environmental audit under Division 9.4 of Part 9 of the EP&A Act. This includes conditions in respect of incident notification, reporting and response, noncompliance notification, Site audit report and independent auditing.  Note: For the purposes of this condition, as set out in the EP&A Act, "monitoring" is monitoring of the development to provide data on compliance with the consent or on the environmental impact of the development, and an "environmental audit "is a periodic or particular documented evaluation of the development to provide information on compliance with the consent or the environmental management or impact of the development.	Procedural condition.	This audit is aligned to the requirements of Div 9.4 of Part 9 of the P&A Act. Div 9.4 is applicable to SSD developments. This Ifsa and its scope is aligned to the requirements of s9.39(2); s9.39(3); s9.40; s9.41(2); s9.42(1); and s9.42(2) of the EP&A Act.		
	Access to Information				
A25	At least 48 hours before the commencement of construction until the completion of all works under this consent, or such other time as agreed by the Planning Secretary, the Applicant must:  (a) make the following information and documents (as they are obtained or approved)  publicly available on its website:  (ii) all current statutory approvals for the development;  (iii) all current statutory approvals for the development;  (iv) regular reporting on the environmental performance of the development in accordance with the reporting arrangements in any plans or programs approved under the conditions of this consent;  (iv) regular reporting on the environmental performance of the development in accordance with the reporting arrangements in any plans or programs approved under the conditions of this consent;  (v) a comprehensive summary of the monitoring results of the development, reported in accordance with the specifications in any conditions of this consent, or any approved plans and programs;  (vii) a summary of the current stage and progress of the development;  (vii) contact details to enquire about the development or to make a complaint;  (viii) acmist register, updated monthly;  (vii) audit reports prepared as part of any independent audit of the development and the Applicant's response to the recommendations in any audit report;  (x) any other matter required by the Planning Secretary; and (b) keep such information up to date, to the satisfaction of the Planning Secretary.	On the 21/7 it was confirmed that copies of the following documents were publicly available on the applicants website;  - Development Consent  - Approved Plans  - Crown Certificate  - Construction Environmental Management Plan  - Complaints Register (Last updated in May)  - Community Communication Strategy  - Project Updates (dated February 2019, May 2019, 16 May 2020 and 28 May 2020).	The EIS, Response to Submissions and Supplementary Response to Submissions are not published on the website as triggered by condition A2.

Notification of such construction activities as referenced in Condition C4 m	during the site visit.  Refer to Site Notice Photo in photo log.  Plant and equipment certification stickers were observed on multiple items of plant.  Daily pre-start log books are filled in for plant and equipment on the project.  Access to the project site during the approved hours was observed in the security sign-in sheet during the site inspection.  No complaints received to date.	Compliance with condition has been demonstrated.  Compliance with condition has been demonstrated.		
C2 C3	Site Notice  A site notice(s):  (a) must be prominently displayed at the boundaries of the site during construction for the purpose of informing the public of project details including, but not limited to the details of the Builder, Certifier and Structural Engineer is to satisfy the following requirements;  (b) minimum dimensions of the notice must measure 841 mm x 594 mm (A1) with any text on the notice to be a minimum of 30-point type size;  (c) the notice is to be durable and weatherproof and is to be displayed throughout the works period;  (d) the approved hours of work, the name of the site/ project manager, the responsible managing company (if any), it is address and 24-hour contact phone number for any inquiries, including construction/ noise complaint must be displayed on the site notice; and (e) the notice(s) is to be mounted at eye level on the perimeter hoardings/fencing and is to state that unauthorised entry to the site is not permitted.  Operation of Plant and Equipment  All construction plant and Equipment used on site must be maintained in a proper and efficient condition and operated in a proper and efficient manner.  Construction, including the delivery of materials to and from the site, may only be carried out between the following hours:  (a) between 7am and 6pm, Mondays to Fridays inclusive; and (b) between 8am and 1pm, Saturdays.  No work may be carried out on Sundays or public holidays.  Construction activities may be undertaken outside of the hours in condition C3 if required:  (a) by the Police or a public authority for the delivery of vehicles, plant or materials; or (b) in an emergency to avoid the loss of life, damage to property or to prevent environmental harm; or (c) where a variation is approved in advance in writing by the Planning Secretary or his nomine elf appropriate justification is provided for the works.	during the site visit.  Refer to Site Notice Photo in photo log.  Plant and equipment certification stickers were observed on multiple items of plant.  Daily pre-start log books are filled in for plant and equipment on the project.  Access to the project site during the approved hours was observed in the security sign-in sheet during the site inspection.  No complaints received to date.	Compliance with condition has been demonstrated.  Compliance with condition has been demonstrated.  Not triggered		

C6	Rock breaking, rock hammering, sheet piling, pile driving and similar activities may only be carried out between the following hours: (a) 9 am to 12 pm, Monday to Friday; (b) 2 pm to 5 pm Monday to Friday; (c) 9 am to 12 pm, Saturday.  Implementation of Management Plans	No rock breaking, rock hammering, sheet piling or pile driving has occurred on the project.  No complaints pertaining to excessive noise activities on the project to date.	Not triggered		
C7	Implementation of unadagetical: Training and the construction of the development in accordance with the most recent version of the approved CEMP (including Sub-Plans).	Adequacy of mitigation measures implemented for the project is being assessed as part of this audit.  No evidence to suggest the construction of the development is not	Compliance with condition has been demonstrated.		
		being carried out in accordance with the CEMP and Sub-plans.			
	Construction Traffic				
C8	All construction vehicles (excluding site personnel vehicles) are to be contained wholly within the site, except if located in an approved on-street work zone, and vehicles must enter the site before stopping.	All construction vehicles (excluding worker vehicles) were observed contained within the project site boundary for the duration of the site audit.	Compliance with condition has been demonstrated.		
	Hoarding Requirements				
C9	The following hoarding requirements must be complied with: (a) no third-party advertising is permitted to be displayed on the subject hoarding/fencing; and (b) the construction site manager must be responsible for the removal of all graffit if rom any construction hoardings or the like within the construction area within 48 hours of its	Site Manager confirmed there was a break-in on 26/10/19 and some site machinery was spray painted. This was removed. No third party advertising or graffiti were observed on project site hoarding or the site during the site inspection.	Compliance with condition has been demonstrated.		
	application.	No hoardings installed over Council footways or road reserves.			
	No Obstruction of Public Way				
C10	The public way (outside of any approved construction works zone) must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances.	All public ways in proximity of the project site were observed to be free of obstructions.	Compliance with condition has been demonstrated.		
	Access and Services to Lot 4 DP1244925				
C11	Construction of Stage 1 must be managed so as not impinge upon the temporary access and services easement located along the eastern boundary of the site so as to comply with the terms of the easement and any other legal agreements entered into with the owner of Lot 4 DP1244925.		Compliance with condition has been demonstrated.		
	Construction Noise Limits				
C12	The development must be constructed to achieve the construction noise management levels detailed in the interim Construction Noise Guideline (DECC, 2009). All feasible and reasonable noise mitigation measures must be implemented and any activities that could exceed the construction noise management levels must be identified and managed in accordance with the management and mitigation measures identified in the approved Construction Noise and Vibration Management Plan.	Sighted in Appendix G of CEMP Rev 2 dated 03/06/20 CNVMP Acoustic Logic Rev 2 dated 03/06/20.  No complaints have been identified as being received from local residents for any perceived excessive noise generating activities from the project to date.	Compliance with condition has been demonstrated.		
C13	The Applicant must ensure construction vehicles (including concrete agitator trucks) do not arrive at the site or surrounding outside of the construction hours of work outlined under condition C3.	The sighted project site security sign-in sheet indicates that the site is being accessed during approved hours only.  No complaints have been identified as being received from local residents for any perceived excessive noise generating activities outside of the approved construction hours.	Compliance with condition has been demonstrated.		
C14	The Applicant must implement, where practicable and without compromising the safety of construction staff or members of the public, the use of 'quackers' to ensure noise impacts on surrounding noise sensitive receivers are minimised.	No complaints have been identified as being received from local residents for any perceived excessive noise generating activities from the project to date.	Compliance with condition has been demonstrated.		
		No tonal alarm were observed during the site audit.			

	Vibration Criteria				
C15	Vibration criteria  Vibration caused by construction at any residence or structure outside the site must be limited	There has been no identification of recorded incidents or complaints	Compliance with condition has been demonstrated		
C13	to:	by local residents regarding perceived vibration impact from	compriance with condition has been demonstrated.		
	(a) for structural damage, the latest version of DIN 4150-3 (1992-02) Structural vibration -	construction activities.			
	Effects of vibration on structures (German Institute for Standardisation, 1999); and	construction activities.			
	(b) for human exposure, the acceptable vibration values set out in the Environmental Noise				
	Management Assessing Vibration: a technical guideline (DEC, 2006) (as may be updated				
	or replaced from time to time).				
C16	Vibratory compactors must not be used closer than 30 metres from residential buildings unless	No complaints have been identified as being received from local	Compliance with condition has been demonstrated.		
	vibration monitoring confirms compliance with the vibration criteria specified in condition C15.	residents for any perceived excessive vibration generating activities			
		from the project to date.			
C17	The limits in conditions C15 and C16 apply unless otherwise outlined in a Construction Noise	NA	NA .		
	and Vibration Management Plan, approved as part of the CEMP required by condition B17 of				
	this consent.				
	Tree Protection				
C18	For the duration of the construction works:	No street trees have been trimmed or removed during the works.	Compliance with condition has been demonstrated.		
C18	(a) street trees must not be trimmed or removed unless it forms a part of this development	No street trees have been trimmed or removed during the works.	Compliance with condition has been demonstrated.		
	consent or prior written approval from Council is obtained or is required in an emergency	No accordance have been ideatified as being according to the land			
		No complaints have been identified as being received from local			
	to avoid the loss of life or damage to property;	residents for any damage to trees or surrounding vegetation from the project to date.			
1	(b) all street trees must be protected at all times during construction. Any tree on the	project to date.			
	footpath, which is damaged or removed during construction due to an emergency, must be replaced, to the satisfaction of Council;				
1	(c) all trees on the site that are not approved for removal must be suitably protected during				
	construction as per recommendations of the Arboricultural Impact Assessment Report				
	(Rev. 01) prepared by Paul Shearer Consulting dated 12 February 2019; and (d) if access to the area within any protective barrier is required during the works, it must be				
	carried out under the supervision of a qualified arborist. Alternative tree protection				
	measures must be installed, as required. The removal of tree protection measures,				
	following completion of the works, must be carried out under the supervision of a qualified				
	arborist and must avoid both direct mechanical injury to the structure of the tree and soil				
	compaction within the canopy or the limit of the former protective fencing, whichever is				
	the greater.				
C10	Air Quality The Applicant must the all reasonable store to minimize dust generated during all works.	No visible dust emissions were noted during the site inspection	Compliance with condition has been demonstrated		
C19	The Applicant must take all reasonable steps to minimise dust generated during all works	No visible dust emissions were noted during the site inspection.	Compliance with condition has been demonstrated.		
C19		No visible dust emissions were noted during the site inspection.	Compliance with condition has been demonstrated.		
C19	The Applicant must take all reasonable steps to minimise dust generated during all works	No visible dust emissions were noted during the site inspection.	Compliance with condition has been demonstrated.		
	The Applicant must take all reasonable steps to minimise dust generated during all works authorised by this consent.				
C19	The Applicant must take all reasonable steps to minimise dust generated during all works authorised by this consent.  During construction, the Applicant must ensure that:	No visible dust emissions were noted during the site inspection.  Stockpiles on the site were observed to be wet due to recent rainfall.			
	The Applicant must take all reasonable steps to minimise dust generated during all works authorised by this consent.  During construction, the Applicant must ensure that: (a) exposed surfaces and stockpiles are suppressed by regular watering:	Stockpiles on the site were observed to be wet due to recent rainfall.			
	The Applicant must take all reasonable steps to minimise dust generated during all works authorised by this consent.  During construction, the Applicant must ensure that: (a) exposed surfaces and stockpiles are suppressed by regular watering; (b) all trucks entering or leaving the site with loads have their loads covered;				
	The Applicant must take all reasonable steps to minimise dust generated during all works authorised by this consent.  During construction, the Applicant must ensure that: (a) exposed surfaces and stockpiles are suppressed by regular watering; (b) all trucks entering or leaving the site with loads have their loads covered; (c) trucks associated with the development do not track dirt onto the public road network;	Stockpiles on the site were observed to be wet due to recent rainfall.  No trucks were observed leaving site during the audit.			
	The Applicant must take all reasonable steps to minimise dust generated during all works authorised by this consent.  During construction, the Applicant must ensure that: (a) exposed surfaces and stockpiles are suppressed by regular watering; (b) all trucks entering or leaving the site with loads have their loads covered; (c) trucks associated with the development do not track dirt onto the public road network; (d) public roads used by these trucks are kept clean; and	Stockpiles on the site were observed to be wet due to recent rainfall.			
	The Applicant must take all reasonable steps to minimise dust generated during all works authorised by this consent.  During construction, the Applicant must ensure that: (a) exposed surfaces and stockpiles are suppressed by regular watering; (b) all trucks entering or leaving the site with loads have their loads covered; (c) rucks associated with the development do not track dirt onto the public road network; (d) public roads used by these trucks are kept clean; and (e) land stabilisation works are carried out progressively on site to minimise exposed	Stockpiles on the site were observed to be wet due to recent rainfall.  No trucks were observed leaving site during the audit.			
	The Applicant must take all reasonable steps to minimise dust generated during all works authorised by this consent. Fire Safety Certificate	No hoardings installed over Council footways or road reserves.	Not triggered - None to date.		

Appendix 2: Writ	ten Incident Notification and Reporting Requirements				
1	A written incident notification addressing the requirements set out below must be emailed to the Planning Secretary at the following address: compliance@planning.nsw.gov.au within seven days after the Applicant becomes aware of an incident. Notification is required to be given under this condition even if the Applicant fails to give the notification required under condition A27 or, having given such notification, subsequently forms the view that an incident has not occurred.	NA .	Not triggered - None to date.		
2	Written notification of an incident must: (a) identify the development and application number; (b) provide details of the incident (date, time, location, a brief description of what occurred and why it is classified as an incident); (c) identify how the incident was detected; (d) identify when the applicant became aware of the incident; (e) identify any actual or potential non-compliance with conditions of consent; (f) describe what immediate steps were taken in relation to the incident; (g) identify further action(s) that will be taken in relation to the incident; and (h) identify a project contact for further communication regarding the incident.	NA .	Not triggered - None to date.		
3	Within 30 days of the date on which the incident occurred or as otherwise agreed to by the Planning Secretary, the Applicant must provide the Planning Secretary and any relevant public authorities (as determined by the Planning Secretary) with a detailed report on the incident addressing all requirements below, and such further reports as may be requested.	NA .	Not triggered - None to date.		
4	The Incident Report must include:  (a) a summary of the incident; (b) outcomes of an incident investigation, including identification of the cause of the incident; (c) details of the corrective and preventative actions that have been, or will be, implemented to address the incident and prevent recurrence; and (d) details of any communication with other stakeholders regarding the incident.	NA .	Not triggered - None to date.
