

# Gledswood Hills Public School

Project update | August 2022

## Investing in our schools

The NSW Government is investing \$8.6 billion in school infrastructure over the next four years, continuing its program to deliver 160 new and upgraded schools to support communities across NSW. This builds on the more than \$9.1 billion invested in projects delivered since 2017, a program of \$17.7 billion in public education infrastructure.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

## Project overview

As part of the department's strategy to address population growth and enrolment demand in the south west Sydney growth area, the stage 2 upgrade of Gledswood Hills Public School is underway.

Stage 1 was completed in 2020 which included a hall, library, canteen and 24 classrooms. Stage 2 will deliver an additional 20 flexible learning spaces and an expansion of the existing onsite car parking to 75 spaces.

To cater for enrolment demand in the area, enrolments are now open for a new primary school in Gregory Hills which will be operational in early 2023.

## Progress summary

Following an initial phase of market engagement, School Infrastructure NSW is continuing the tender for stage 2 of the Gledswood Hills Public School upgrade.

School Infrastructure NSW will work with the successful contractor to finish the detailed design for the project and will then start construction. School Infrastructure NSW will work with the Gledswood Hills Public School executive to limit the impact of construction on students and staff.

## Frequently asked questions

### When will construction of the project begin?

Construction on the upgrade for Gledswood Hills Public School stage 2 will start when design development is completed and planning approval conditions are met. More information will be shared once this has been confirmed.

### What safety measures will be in place?

The safety of the school's students, staff and the local community is our highest priority. Construction planning will be designed so there is minimal impact on school operations. Safety measures such as hoardings, signage and separate access points will be in place to ensure students are not able to enter the construction site.

To minimise disruption to school operations and activities, site deliveries will be scheduled outside of school drop off and pick up times (where possible) and traffic control personnel will be onsite to assist with contractor deliveries and traffic movement.

We will work closely with the school leadership to manage construction impacts and find solutions to ensure school operations are appropriately maintained. This may include split play times to ensure children have enough play space during construction.

### What steps will be taken to control noise and dust impacts?

All work onsite will be conducted in accordance with NSW Government noise, safety and building regulations. We will be working closely with the school Principal to minimise impacts to staff, teachers, students and neighbours.

### How will traffic be managed?

Construction vehicle movements and deliveries will be scheduled outside of peak school operation times. Traffic management will be in place where required to manage vehicles entering and exiting the site in a safe manner.

### How will the community be kept informed?

We will keep the school and local community informed through project notifications, information booths, school newsletters, and website updates. For up to date information please visit [www.schoolinfrastructure.nsw.gov.au/projects/g/gledswood-hills-new-primary-school1.html](http://www.schoolinfrastructure.nsw.gov.au/projects/g/gledswood-hills-new-primary-school1.html)

### How can I get in touch?

School Infrastructure NSW (SINSW) is committed to keeping the school and local communities informed about the project. We do this in a range of ways. In particular with information sessions, project updates (such as this document), the school newsletter, and the project page on the SINSW website.

If you have any further queries, please do not hesitate to contact the SINSW community hotline or email address below. Your questions and comments help inform future project updates
