Googong Primary School

Project update | November 2022

Investing in our schools

The NSW Government is investing \$8.6 billion in school infrastructure over the next four years, continuing its program to deliver 160 new and upgraded schools to support communities across NSW. This builds on the more than \$9.1 billion invested in projects delivered since 2017, a program of \$17.7 billion in public education infrastructure.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

Project overview

When the new school is completed, it will accommodate up to 700 students in 30 flexible learning spaces and three support classrooms. The project will also deliver administration and staff facilities, a library, hall, covered outdoor learning area and landscaped play spaces.

Progress summary

Googong Public School will open operationally ready on Day 1 Term 1 2023. On this day, stage one works will be completed and all the elements the school needs to operate will be available. This includes Buildings A, B, C, and D, student amenities, walkways, a car park, and external play space. On Gorman Drive, a new pedestrian crossing and footpath will be completed, and Aprasia Avenue will have a temporary kiss-and-drop zone in place.

In early 2023 stage two works will be completed. This work includes landscaping the remaining play space and the installation of a permanent kiss-and-drop zone on Wilkins Way. The stage two landscaping work will be separated from the school community by a 2.1-metre-high temporary fence and have its own entry gates.

Please see the map overleaf of the staged delivery of the school.
