

Artist impression of the new primary school in Googong

New public school in Googong

Project update

September 2021

Investing in our schools

The NSW Government is investing \$7.9 billion over the next four years, continuing its program to deliver 215 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

Project overview

Planning is underway to build a new primary school in Googong, which will deliver facilities to accommodate up to 700 students. The project is being fast-tracked as part of the NSW Government's \$3 billion Jobs and Infrastructure Acceleration fund.

Progress summary

In June 2021, School Infrastructure NSW (SINSW) hosted a Virtual Information Session, which coincided with the public exhibition of the State Significant Development Application (SSDA). The Virtual Information Session was attended by 220 community members, with overwhelmingly positive feedback for the project.

Information provided during the Virtual Information Session, including artist impressions of the new school, are available on the project webpage.

In August 2021, the Early Contractor Involvement (ECI) contract was awarded to Hansen Yunken.

Next steps

The project team will continue to work on finalising the response to formal submissions made during the SSDA exhibition period for approval to progress from planning through to project delivery.

As the project progresses into the next phase we'll be able to share more information about the new primary school at Googong and encourage further questions and feedback.
