

Greystanes Public School

Project update

January 2019

Investing in our schools

The NSW Government is investing \$6 billion over the next four years to deliver more than 170 new and upgraded schools to support communities across NSW. In addition, a record \$847 million is being spent on school maintenance over four years. This is the largest investment in public education infrastructure in the history of NSW.

Greystanes Public School

A project is underway to upgrade Greystanes Public School. The project will deliver:

- 24 new permanent learning spaces
- refurbishment of admin block into a multi-purpose space
- new administration building.

Progress summary

The construction contract has been awarded to Lahey Constructions and site has been established.

Next steps

Works on the upgrade commenced in late December 2018 and is expected to be completed by late 2019.

Traffic control and security measures will be in place where required for the safety of students, staff, and the community.

We are here to make sure that work is completed safely and efficiently and we will minimise impacts on the community at every opportunity.

Keeping you updated

School Infrastructure NSW will continue to keep the local community updated as the project progresses.
