Greystanes Public School

Project update

June 2021

Investing in our schools

The NSW Government is investing \$7 billion over the next four years, continuing its program to deliver more than 200 new and upgraded schools to support communities across NSW. This is the largest investment in public education infrastructure in the history of NSW.

The NSW Department of Education is committed to delivering new and upgraded schools for communities across NSW. The delivery of these important projects is essential to the future learning needs of our students and supports growth in the local economy.

Project overview

A project is underway to upgrade Greystanes Public School. The project will deliver:

- 24 new permanent learning spaces (Block M North and South Wings)
- refurbishment of the administration block into a multi-purpose space
- a new administration building (Block L).

Progress summary

Work on the school upgrade is progressing well.

The new Covered Outdoor Learning Area (COLA), new Administration building (Block L) and associated landscaping are now complete and have been handed over to the school to use. The new

Administration building includes separate visitor and student foyers, staff room, offices, student sick bay, a printing room and toilet facilities.

Construction works for the new permanent learning spaces (Block M North and South Wings) are largely completed. The North Wing was completed earlier this year, along with the South Wing ground floor concrete slabs and retaining walls. When complete, the new buildings will be linked through an elevated walkway on the first floor and will also connect to the existing facilities through a new covered walkway and stairs to the existing sports court.

The new learning spaces will be ready for use by staff and students when the South Wing is completed in late 2021.

Next steps

- Start refurbishment of existing Block A Building into new multi-purpose space.
- Installation of external walls and Structural steelwork for the roof structure to Block M South Wing.

The project is anticipated to be completed late 2021.

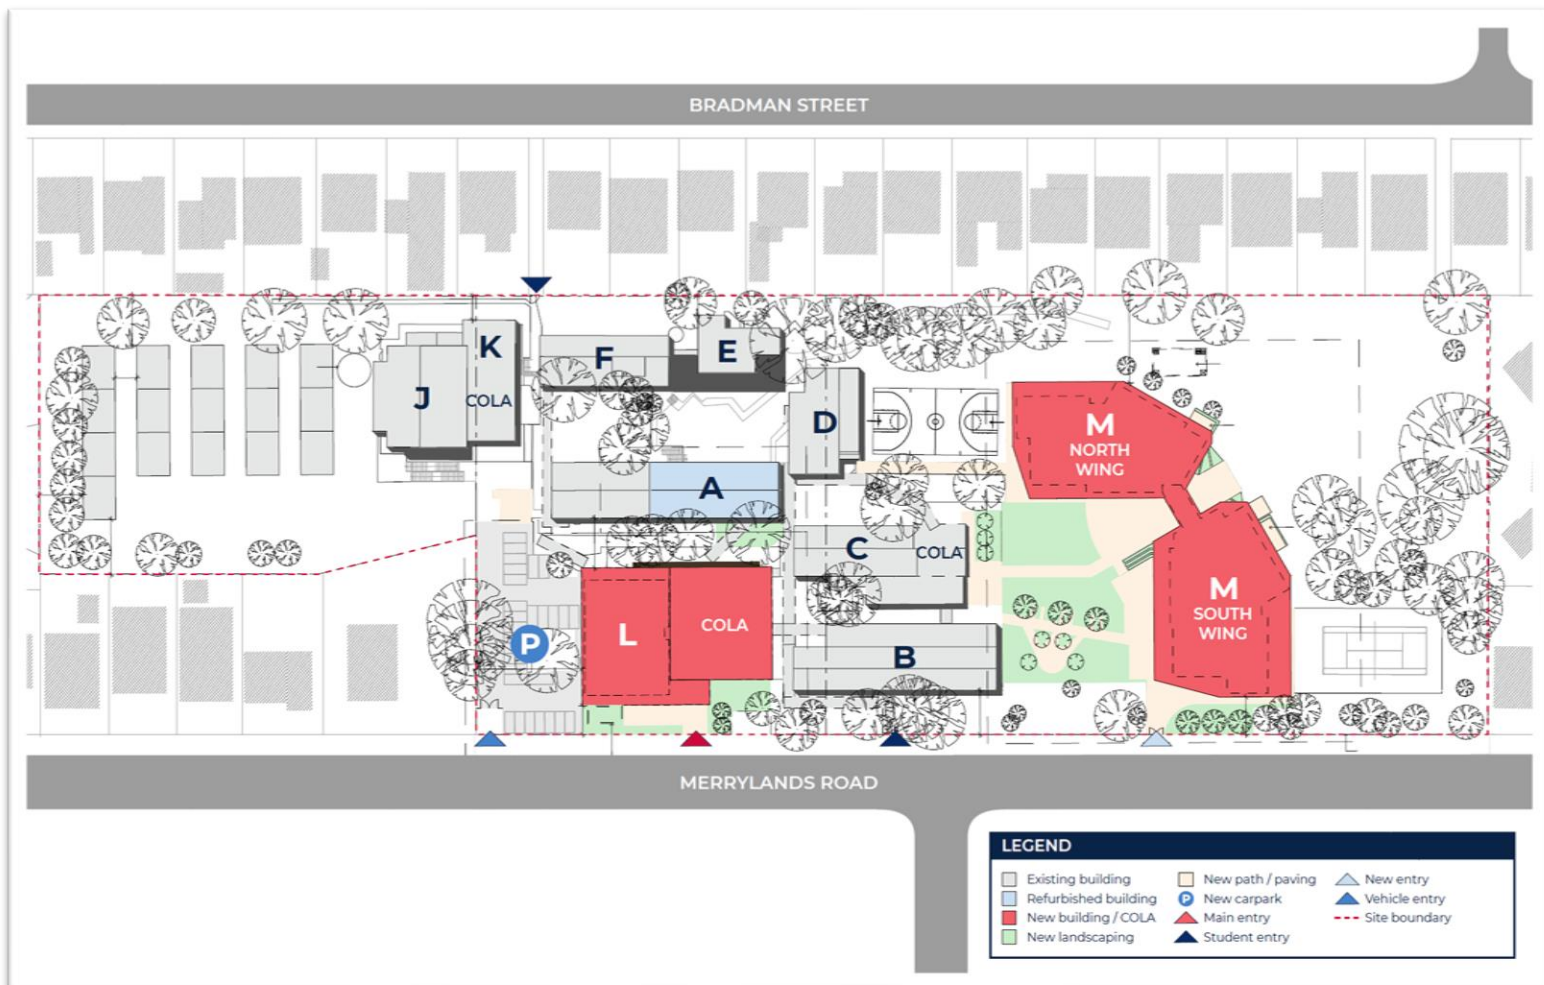

Keeping you updated

We will keep the local school community and residents informed as the project progresses.
