

# Hurlstone Agricultural High School

## Works notification

22 August 2022

Dear community,

Site preparation at Hurlstone Agricultural High School is underway with remediation works completed at Building B, Building C and the pool pump room followed by the demolition of the buildings as per the site map overleaf.

After demolishing the buildings, the Contractor has identified additional material in the grounds underneath the pool area and Building N containing asbestos. Please note the pool, Building N and immediate surroundings are within the construction site and are not accessible to students and staff. Approved control measures and air monitoring remain in place.

Works to remediate the area underneath the pool will start on 22 August 2022 and are expected to be completed within three weeks.

The pool area will be remediated in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Building N area is currently under further investigation and more information will be provided in due course.

Testing will be completed to ensure these areas have been fully remediated and an independent asbestos assessor will issue a clearance certificate following remediation.

The health, safety, and wellbeing of the school and the local community are our highest priority, and we will continue to keep the community updated.

Thank you for your patience while we deliver this important school infrastructure.
