

Hurlstone Agricultural High School

Works notification

29 August 2022

Dear community,

Last week we notified you that site preparation is underway and asbestos removal would take place underneath the demolished pool area.

After demolishing the buildings, the Contractor also identified additional material in the grounds underneath Building N containing asbestos. Works to remediate the area underneath Building N will start on 30 August 2022 and are expected to be completed by 4 October 2022.

The area under Building N will be remediated in accordance with SafeWork NSW regulations and the NSW Department of Education's Asbestos Management Plan. All work will be completed by licensed and accredited asbestos contractors and monitored by occupational hygienists in strict accordance with all applicable legislation, regulations, policies and guidelines.

Please note that Building N and its immediate surroundings are within the construction site and are not accessible to students and staff. Approved control measures and air monitoring remain in place.

Testing will be completed to ensure these areas have been fully remediated and an independent asbestos assessor will issue a clearance certificate following remediation.

The health, safety, and wellbeing of the school and the local community are our highest priority, and we will continue to keep the community updated.

Thank you for your patience while we deliver this important school infrastructure.
