

Springwood High School

Project update | July 2026

Dear staff, parents and carers,

The NSW Government is committed to delivering high potential and gifted education (HPGE) in every school by investing an additional \$50 million into the HPGE Partner School program. This is in addition to the \$50 million investment in the 2024/25 NSW Budget which has already started to benefit 13 high schools across the state.

Under the program, 33 high schools including Springwood High School will receive facility upgrades to accommodate increased enrolments and broaden educational opportunities. This is in addition to the tailored HPGE offerings available through the *Inspire* program at all NSW schools.

Project overview

The upgrades will include:

food technology, hospitality

science labs

dance studio

music rooms

entrance enhancements

woodwork rooms

drama spaces

visual arts room

media lab

science, technology, engineering and maths (STEM) rooms

Progress summary

Work is progressing well on the refurbishment of the school's 2 woodwork classrooms. The upgraded classrooms will provide improved facilities and equipment to support practical teaching and learning.

The first woodwork classroom is almost finished and is expected to be handed over to the school by the middle of Term 3 2026. Work will then begin on the second classroom, which is expected to be handed over to the school at the start of Term 4 2026.

Next steps

Planning for the next stage of the upgrade is under way. Concept design is progressing for the new front entrance, and we're preparing to appoint a construction contractor for the next stage of work.

The next stage will include improvements to the front entrance, food technology facilities, dance and drama spaces, visual arts and music classrooms, a new media lab, and the establishment of specialised STEM classrooms.

Construction on the next stage of the upgrade is expected to begin in early 2027, with all work to finish by the end of 2027.
