## Inner Sydney High School

### Project update

February 2020

#### Investing in our schools

The NSW Government is investing \$6.7 billion over four years to deliver more than 190 new and upgraded schools to support communities across NSW.

In addition, a record \$1.3 billion is being spent on school maintenance over five years. This is the largest investment in public education infrastructure in the history of NSW.

#### Day 1 Term 1 2020

Inner Sydney High School opened with the arrival of its first Year 7 students on Day 1 Term 1 – Wednesday 29 January 2020 at 8.30am.

School Infrastructure worked closely with the Inner Sydney High School Principal and staff to ensure students had a great first day experience at their new school.

On Day 1 Term 1 2020, School Infrastructure had team members located at the Central Station exit on Chalmers Street, at the bus stop in Cleveland Street and in front of the main entry to the school, to help parents and students with directions and provide information.

School infrastructure also provided accredited traffic control personnel on site from 8:00am to 4:00pm on Wednesday, Thursday and Friday to direct and familiarise students with the safe, signalised pedestrian crossing point at the corner of Cleveland and Chalmers Streets.

Inner Sydney High School's 14 storey tower building is taking shape

## Construction progress

- The school community is occupying the heritage buildings on the site, with construction of the 14 storey tower continuing
- The tower lift jump-form is up to level 10
- The level 7 slab has been poured
- External landscape and garden works are progressing

We are sure you will remain mindful of the presence and safety of students, particularly as they get used to moving in and around their new school.

Throughout 2020, construction of the new tower continues. To ensure safety of the students and staff, this area is securely segregated from the operational area of the school. We will provide updates as construction progresses.
