Jindabyne Education Campus

Project update | May 2023

Project overview

A project is underway to build a new education campus in Jindabyne as part of the Snowy Mountains Special Activation Precinct. The purpose-built campus will include a separate primary school and high school, known as Jindabyne Public School and Jindabyne High School, with modern facilities to support students, teachers, and the community.

The primary and high schools will include flexible learning spaces, libraries, halls, playing fields, open spaces and access to specialist facilities for art, woodwork, metalwork, music, drama and science.

The campus will also include a new Connected Learning Centre (CLC) being delivered by TAFE NSW and specialist Vocational Education Training (VET) facilities for hospitality, construction, entertainment and primary industry courses.

Once the new schools have been completed, students and staff from Jindabyne Central School will move into the new facilities and the Jindabyne Central School site will cease to operate.

Progress summary

The construction contract has been awarded to Hansen Yuncken Pty Ltd and main works are now underway.

The concrete slabs have been poured for the administration building and high school gymnasium. In-ground services such as stormwater drainage and sewerage systems are in place. Earthworks for the sports field are underway.

The birds that were temporarily relocated to Snowy Mountains Wildlife Rescue organisation, LAOKO, during the tree removal process have now been returned to the school site.

Next steps:

- Pouring concrete for the ground floor of the high school gym
- Pouring concrete for the high school general learning spaces
- Installing structural steel floors for the primary school buildings
- Constructing kerbs and gutters through the car park, main entry and kiss and drop zone.
