

New Jindabyne education campus

Planning update

December 2020

Process timeline

Planning for a new primary and high school at Jindabyne

We are currently undertaking planning for a new education campus at Jindabyne, building a new primary and high school in the special activation precinct area. Once complete, students and staff from the Jindabyne Central School will come together to form a new student population at the Jindabyne education campus. Once the transition is complete the existing school site will cease to operate.

The current planning underway includes development of a master plan and concept design.

To develop the concept designs we need to understand the spatial requirements for the schools and how they might fit within the Jindabyne community.

In addition to innovative teaching and learning spaces, the new schools may also include:

- covered outdoor learning area
- library
- green space
- administrative facilities.

Once the concept designs are developed they will go through an approval process to proceed.

Progress summary

We are in master planning phase and are currently assessing the spatial and community requirements for the schools.

Visit us at the Community Information Hub

We invite you to register your attendance for a drop-in Community Information Hub session where you can find out more about the project and learn about the building process. Registration is required to ensure current social distancing measures are followed.

Our Community Information Hub will be at Snowy Monaro Regional Council Carpark – corner Park Road and Kalkite Street, Jindabyne on the following days and times:

Tuesday 8 December

8:30am to 11:30am and 1:30pm to 4:30pm

Wednesday 9 December

10:00am to 1:00pm and 2:30pm to 6:30pm

Thursday 10 December

8:30am to 11:30am and 1:30pm to 4:30pm

Friday 11 December

8:30am to 11:30am

To book in a session please scan the QR code below or go to <https://www.eventbrite.com/e/community-information-hub-jindabyne-education-campus-tickets-128587942999>

How can I get involved?

We are committed to working together with our school communities and other stakeholders to deliver the best possible learning facilities for students.

Share with us what's important to you. At the Community Information Hub you can also complete our in-hub survey. This will be open Tuesday 8 to Friday 11 December.

Keep in touch

Share with us what's important to you. At the Community Information Hub you can also complete our online survey. You can also visit the project page on the School Infrastructure NSW website at www.schoolinfrastructure.nsw.gov.au.

New Jindabyne education campus

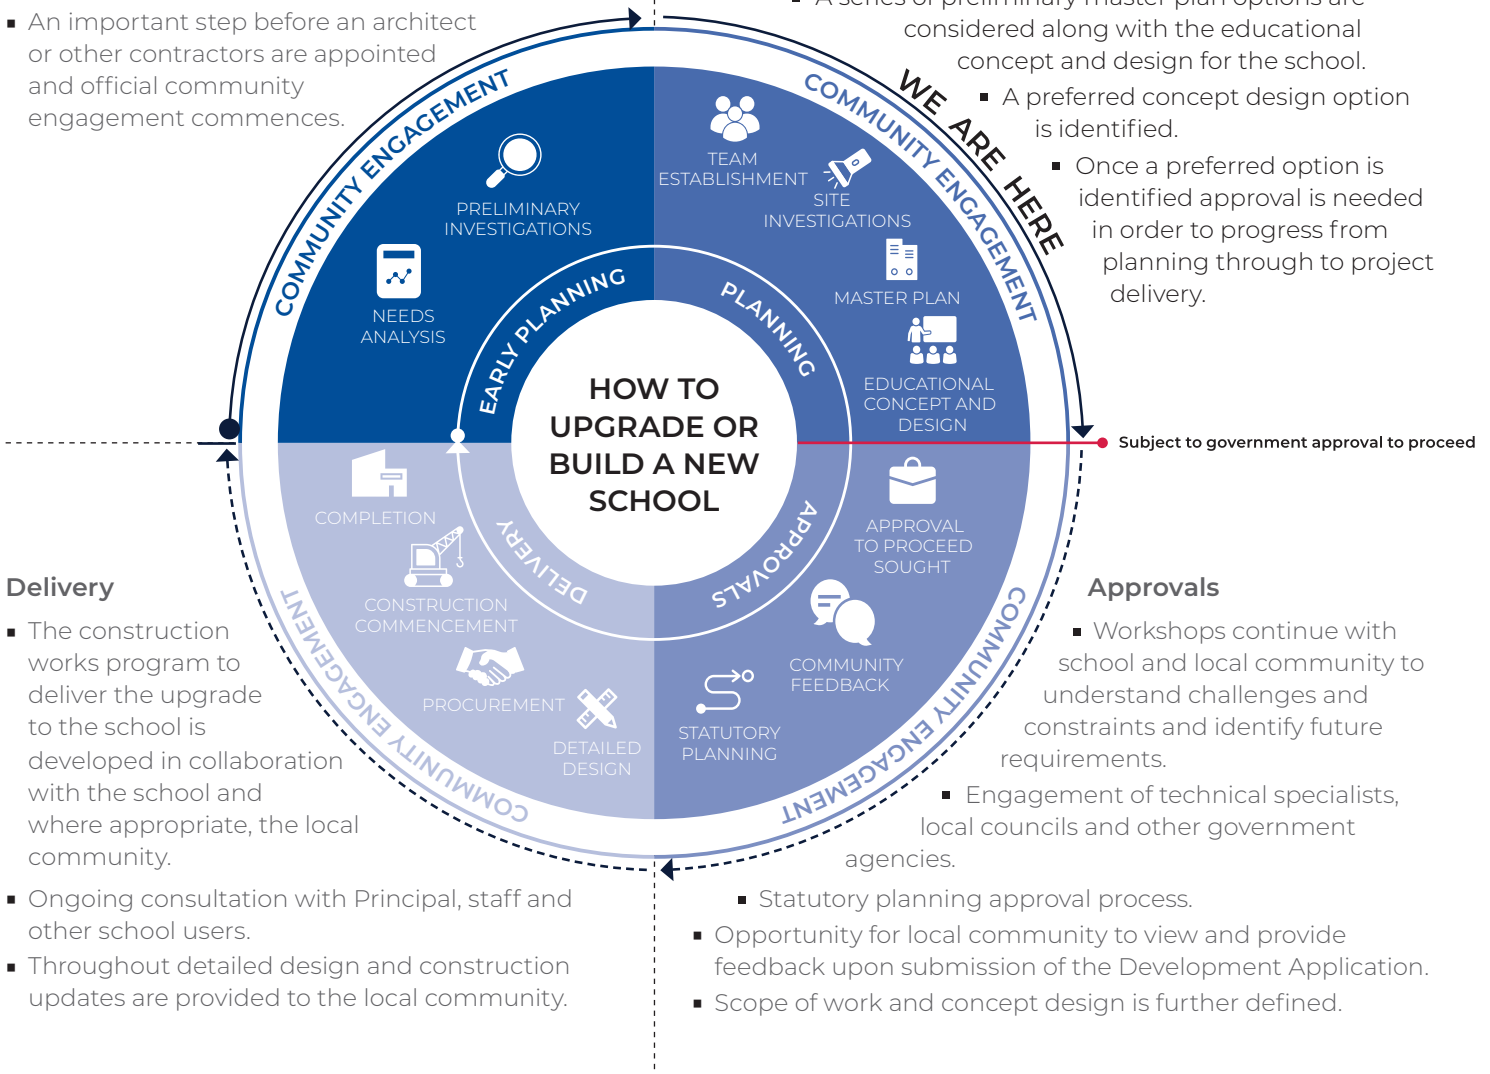

Funding has been allocated to create a new education campus in Jindabyne, with a new primary school and new high school. The information below takes you through the journey of upgrading or building a new school.

Early planning

- Consideration and studies of demographic trends, education requirements, the condition of the existing school buildings, catchment boundaries, heritage requirements, transport links and partnership opportunities.
- Doing so means that we:
 - consider the needs of the local area now and into the future.
 - ensure the right school is designed for the community.
- An important step before an architect or other contractors are appointed and official community engagement commences.

Planning

- Consultants such as architects and project managers are appointed.
- Investigation and review of site and development of master plan options.
- Master planning considers options for the general size, shape and form of buildings for a specific school site.
- A Project Reference Group (PRG) is established.
- Operational, educational and service delivery factors are understood and considered by the PRG.
 - A series of preliminary master plan options are considered along with the educational concept and design for the school.
 - A preferred concept design option is identified.
 - Once a preferred option is identified approval is needed in order to progress from planning through to project delivery.

Delivery

- The construction works program to deliver the upgrade to the school is developed in collaboration with the school and where appropriate, the local community.
- Ongoing consultation with Principal, staff and other school users.
- Throughout detailed design and construction updates are provided to the local community.

Approvals

- Workshops continue with school and local community to understand challenges and constraints and identify future requirements.
 - Engagement of technical specialists, local councils and other government agencies.
 - Statutory planning approval process.
- Opportunity for local community to view and provide feedback upon submission of the Development Application.
- Scope of work and concept design is further defined.
